Container Disposal

DO NOT REUSE THE CONTAINER. Completely empty the contents and pour the unused liquid into a suitable container. Do not pollute water supplies. If the contents of this container have been applied to water, do not wash off with water. Avoid eye to skin contact. If water contact occurs, flush eyes and skin with large amounts of water. Wash treated area away from water supply. Do not pour liquid into storm drains or onto lawns. Do not burn the can. Do not bury. Deeply in an unoccupied area.

DO NOT SPILL. If spilled, dilute with water. Do not drink water.

Do not attempt to clean up a spill or leaking can of this material without strict adherence to all applicable laws.

USE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE EQUIPMENT AND CLOTHING

- (1) Wear waterproof pants, coat, hat, rubber boots or rubber overshoes.
- (2) Wear safety goggles.
- (3) Wear mask or respirator approved by the U.S. Bureau of Mines for parathion protection.
- (4) Wear heavy duty, natural fiber clothing.

WORK SAFETY RULES

Keep all unauthorized persons and children away from treated areas or where there is danger of drift.

If you feel you are becoming ill from exposure in any way, STOP work and get help. Call your supervisor, doctor, or the Gold Kist office at 404-951-1111 - Atlanta, Ga. Explain that this is an emergency. If you are exposed to a spray or dust, immediately shower. After the shower, dress in fresh, clean clothes. Do not reuse old clothes. Do not eat, smoke, or drink alcohol.

INCORPORATED INTO THE SPRAY ARE: WASH WITH SOAP AND WATER. Always wash hands, face, and arms with soap and water before eating, smoking or drinking.

AFTER SPRAYING, DO NOT WALK ON TREATED AREAS. Shower using soap and water. Wear clean clothes when leaving. If you don't wear contaminated clothing, wash protective clothing, and protect it from contact with soil and water after each use. Heavy rain should be avoided if you are spraying. If possible, avoid spraying with respirator.

POISON SIGNS (Symptoms)

Parathion is extremely toxic to humans. It is also very toxic to fish. Do not use near surface waters. Fish which swim in treated material must be removed from treated areas immediately. Do not eat fish from treated areas.

Some of the usual symptoms of parathion are: Headache, nausea, vomiting, diarrhea, weakness, dizziness, lack of coordination, stiffness, pain, diarrhea, headache, nervousness, sweating, watering of eyes, drooling, cramping, convulsions, nose, muscle spasms and coma.

FIRST AID TREATMENT

CALL 911 IMMEDIATELY IF UNCONSCIOUS. Explain that the victim has been exposed to a spray or dust.

DO NOT INDUCE VOMITING. If victim is unconscious, lay him/her on his/her side. If breathing has stopped, begin mouth-to-mouth resuscitation. If heart has stopped, begin external cardiac massage. If eyes are irritated, flush with water for 15 minutes.

In case of eye irritation, flush eyes with water for 15 minutes. If skin contact occurs, wash with soap and water for 15 minutes.

NOTE TO PHYSICIAN

DO NOT INDUCE VOMITING. If victim has been exposed to a spray or dust, call 911 IMMEDIATELY. If victim is unconscious, lay him/her on his/her side. If breathing has stopped, begin mouth-to-mouth resuscitation. If heart has stopped, begin external cardiac massage. If eyes are irritated, flush eyes with water for 15 minutes. If skin contact occurs, wash with soap and water for 15 minutes. If you are uncertain about the treatment of this patient, call 911 IMMEDIATELY.

POST TREATED AREA*

Consult local State Agency or Extension Service for Experimental Station for advice on treated areas.
