# MILL SPRA

A SPACE OR CONTACT SPRAY FOR STORED FOOD PEST CONTROL

Spray into all air currents. Spray upward of walls and ceilings so that as many insects as possible can be contacted with a direct vapor or mist. Permanent Spraying Systems, either automatic or semi-automatic, assist in this method. Electric, portable fogging devices (Challenger, DEH, BVI Fogger), as well as air-compressor units, can also be used.

Room should be kept closed at least ten minutes after spraying. Repeat as often as necessary to keep named insects under control. Periodic spraying of this product assists in the control of new infestations of named insects. After thoroughly spraying as directed, sweep up all dead and dying insects and destroy them.

**FOR INDUSTRIAL USE  
IN FOOD PROCESSING,  
BEVERAGE AND  
WAREHOUSE  
INDUSTRIES**

Spray into all air currents with permanent units, portable electric sprayers, or air guns, into cracks, crevices, or any surface where the above named insects frequent. Apply to cracks of flooring and baseboards, also cracks inside and outside of flour, grain or food handling equipment or bins. Thoroughly mist outside of storage sacks before storing. Spray box cars and store rooms before filling with grain, feed or food products. Repeat at regular intervals or as often as necessary to control named insects.

### NOTICE

The manufacturer and seller warrant that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

### CAUTION

Keep out of reach of children. Harmful if swallowed. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Do not remain in treated areas. Ventilate the area after treatment is completed.

Rinse empty container thoroughly with water or discard it.
