

EXCELCIDE MOTH & BEETLE WAREHOUSE SPRA

A formulation combining the quick knockdown properties of pyrethrins with two synergists, plus Lethane 384 and Methoxychlor, designed to fog or space spray large storage areas for the control of Angoumois Grain Moths and Indian Meal Moths.

EXCELCIDE Moth & Beetle Warehouse Spra can also be used as a contact spray to force the product into cracks and crevices of ceilings, walls, floors, window frames, and under hidden areas beneath storage pallets for control of exposed stages of crawling insects: Saw-Toothed Grain Beetles, Cadelles, Confused Flour Beetles, and Rice Weevils.

This product should be applied with a portable electric sprayer or mister.

CAUTION: KEEP OUT OF REACH OF CHILDREN
(See side panel for additional cautions)

A CONTACT-SPACE SPRAY FORMULA FOR CERTAIN STORED PRODUCT INSECT PESTS - PARTICULARLY ANGOUMOIS GRAIN MOTHS AND INDIAN MEAL MOTHS.

FOR INDUSTRIAL USE IN FOOD STORAGE WAREHOUSES

NOTICE

Seller and manufacturer warrant that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

ACTIVE INGREDIENTS

	100%
Petroleum Distillate	97.07%
Beta-butoxy beta'-thiocyano diethyl ether	1.38%
Methoxychlor, Technical*	1.37%
N-Octyl bicycloheptene dicarboximide**09%
Technical Piperonyl Butoxide***06%
Pyrethrins03%

*Equivalent to 1.21% 2,2-Bis (p-methoxyphenyl)-1,1,1-trichloroethane and .16% other isomers and reaction compounds.
**MGK Insecticide Synergist, U.S. Patent No. 2,476,512
***Equivalent to .05% (butylcarbityl) (6-propylpiperonyl) ether and .01% related compounds.

DIRECTIONS

For space spraying EXCELCIDE Moth & Beetle Warehouse Spra, a portable electric sprayer or misting machine should be used. Spray the product into the entire room after closing off all air currents. The spray should be directed upward at walls and ceilings in such a way that as many of the insects as possible can be contacted with a direct application. Room should be left closed for at least ten minutes after spraying. Repeat as often as necessary in order to keep the named insects under control. Periodic, regular spraying, assists in the control of new batches of the named insects, thereby reducing insect infestations. After spraying, sweep up all dead and dying insects and destroy them.

It is strongly urged that any static accumulations upon which these insects might feed or breed not be allowed to remain dormant in hidden corners or horizontal ledges and instead be periodically vacuumed regularly before applying the spray. Housekeeping is the first principle of stored product pest control and EXCELCIDE Moth & Beetle Warehouse Spra can achieve best results if good basic sanitation practices are used.

CAUTION

Harmful if swallowed. Avoid contact with skin, eyes, and clothing. Avoid breathing of spray mist. Do not remain in treated areas. Ventilate the area after treatment is complete. Avoid contamination of feed and foodstuffs. Do not use in the edible product areas of food processing plants, or areas where food is commercially prepared. Do not apply this product to grain bins or in grain warehouses.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Apply this product only as specified on this label. Do not contaminate water by cleaning of equipment, or disposal of wastes.

CONTAINER DISPOSAL

DRUMS: Do not reuse empty drum. Return drum to reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

PAILS: Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.
