

EXCELCIDE Safeway Stores Space Spra is designed primarily for control of certain small flying and stored product insects such as Houseflies, Mosquitoes, Mediterranean Flour Moths, Indian Meal Moths and Angoumois Grain Moths in their exposed stages, as well as crawling insects such as American, German and Oriental Cockroaches, Firebrats, Silverfish, Confused Flour Beetles, and Saw-Toothed Grain Beetles.

For flying insect control, vaporize EXCELCIDE Safeway Stores Contact Spra into the entire room, after closing off all air currents. We recommend air pressure as best method of vaporizing EXCELCIDE Safeway Stores Contact-Space Spra preferably through our EXCELCIDE Permanent or Portable Spraying Equipment. This spray should be directed upward at the walls and ceilings in such a way that as many of the insects as possible can be contacted with a direct vapor or mist. Room should be left closed for at least ten minutes after spraying. Repeat as often as necessary, preferably once a day, in order to keep the named insects under control. Periodic regular spraying of EXCELCIDE Safeway Stores Space Spra assists in the control of new batches of named insects, thereby reducing insect infestations. Care should be exercised in covering all exposed food and food handling equipment during spraying to eliminate possibility of dead flies contaminating foodstuffs. Dead insects should be regularly removed from plant premises.

ACTIVE INGREDIENTS 100%  
Petroleum Distillate  
Technical Piperonyl Butoxide\*  
Pyrethrins

\*Consists of (butylcarbityl) (6-propylpiperonyl) ether and related compounds.

#### CONTACT—SPACE SPRA

To be used for contact or space spraying for control of certain small flying insects and crawling insects in their exposed stages.

CAUTION: Keep Out of Reach of Children.

THE HUGE' COMPANY, INC.  
884 Hodiament Avenue  
St. Louis, Missouri 63112

EXCELCIDE Safeway Stores Space Spra is also a good contact spray and will kill stored product pests and other crawling insects named above when they are contacted with the vaporized insecticide.

Using the EXCELCIDE Deluxe Residual Tank-Type Sprayer, EXCELCIDE X-L Jet, or EXCELCIDE Permanent Spraying Installations, spray EXCELCIDE Safeway Stores Contact-Space Spra thoroughly into cracks and crevices behind switch boxes, sinks, double wall partitions, baseboards, windows or door casings, and conduits and conduit terminal boxes to drive out and kill above named crawling insects from their breeding sites and harborage. The application must be done so that the insects hiding in these places will be contacted with the spray. Repeat treatment whenever re-infestation occurs, or at regular periodic intervals every 30 days.

Thoroughly clean all flour, grain, and food from handling equipment, storage bins, and conveyors.

Vacuum cleaning rather than pressure-blowing cleaning is recommended.

Spray boxcars and storerooms before filling with flour or food products.

#### CAUTION

Harmful if swallowed. Do not use near heat or open flame. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using this product as a space spray in these areas, apply only when plant is not in operation.
