

EXCELCIDE DYNA FOG WAREHOUSE SPRA

A special ready-to-use formulation combining the quick knockdown properties of Pyrethrins with two synergists, plus Lethane 384 and Methoxychlor, designed to fog or space spray large storage areas primarily for control of larvae and adults of flying moths particularly Angoumois Grain Moths, Indian Meal Moths, as well as Mediterranean Flour Moths.

EXCELCIDE Dyna Fog Warehouse Spra can also be used as a contact spray for forcing the fog into cracks and crevices or other insect hiding places for control of exposed larvae and adults of crawling insects: Saw-Toothed Grain Beetles, Cadelles, Confused Flour Beetles, and Rice Weevils.

The Dyna Fog machine is recommended as the best means of dispersing EXCELCIDE Dyna Fog Warehouse Spra as a fog or space spray throughout the area.

ACTIVE INGREDIENTS 100%
Petroleum Distillate
Tetrachloroethylene
Mineral Seal Oil
Beta-butoxy beta'-thiocyano diethyl
ether
Methoxychlor, Technical*
N-octyl bicycloheptenedicarboximide**
Technical Piperonyl Butoxide***
Pyrethrins

Comments

*Consists of 2,2-bis (p-methoxyphenyl)-1,1,1-trichloroethane and other isomers, and related compounds.

**MGK 264, Insecticide Synergist, U. S. Patent No. 2476512

***Consists of (butylcarbityl) (6-propylpiperonyl) ether and related compounds.

EXCELCIDE DYNA FOG WAREHOUSE SPRA

NOTICE: The Hugel Company, Inc. warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use.

DIRECTIONS

For space spraying or fogging the objective is to completely vaporize the entire room. Room should be kept closed for at least ten minutes after spraying. Repeat as often as necessary to keep stored product pests under control. Periodic spraying with EXCELCIDE Dyna Fog Warehouse Spra assists in the control of new batches of named insects, thereby reducing infestation. After spraying EXCELCIDE Dyna Fog Warehouse Spra as directed, sweep up all dead and dying insects and destroy them.

It is strongly urged that any static accumulations upon which these insects might feed or breed not be allowed to remain dormant in hidden corners or horizontal ledges and instead be thoroughly and periodically vacuumed regularly before applying the spray. Housekeeping is the first principle of stored product pest control and EXCELCIDE Dyna Fog Warehouse Spra can achieve best results if good basic sanitation practices are used in connection with the product.

CAUTION: Harmful if swallowed. May cause irritation of eyes and mucus membranes. Avoid contact with skin. In case of skin contact, wash with soap and water. Avoid breathing spray mist. When using the product as a space spray in these areas, apply only when plant is not in operation. Do not use in the edible products areas of food processing plants. This product is not intended for household use.
