"EXCELCIDE"

PG

SPACE SPRA

ACCEPTED

7-25-68

2270-76

FOR THE FLOW POTION REGISTER

DIRECTIONS

EXCELCIDE PG SPACE SPRA is designed for control of crawling insects such as Ants and Silverfish, as well as stored product pests such as Confused Flour Beetles, Red Flour Beetles, Rice Beetles, Caddis, Saw-Toothed Grain Beetles, Dermestid Beetles, and Carpet Beetles, in their accessible stages. Thoroughly clean all flour, grain, and food dusts from horizontal surfaces, since these static accumulations encourage stored product pest breeding.

Spray EXCELCIDE PG SPACE SPRA with permanent Spraying installations, portable electric sprayers, or foggers, as mentioned above, applying to walls, floors, baseboards, wall floor junctures, window sills, doorway areas, and storage areas. Spray outside of storage sacks before storing. Spray box cars and store rooms before filling with grain, feed, or food products. Repeat at regular intervals or as often as necessary to control the named insects.

CAUTION: Keep out of reach of children.

(See additional cautions on right panel)

CAUTION

Harmful if swallowed. Use the product as a space spray in food processing plants only when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. Do not use or store near heat or open flame.

USDA Reg. No. 2270-76

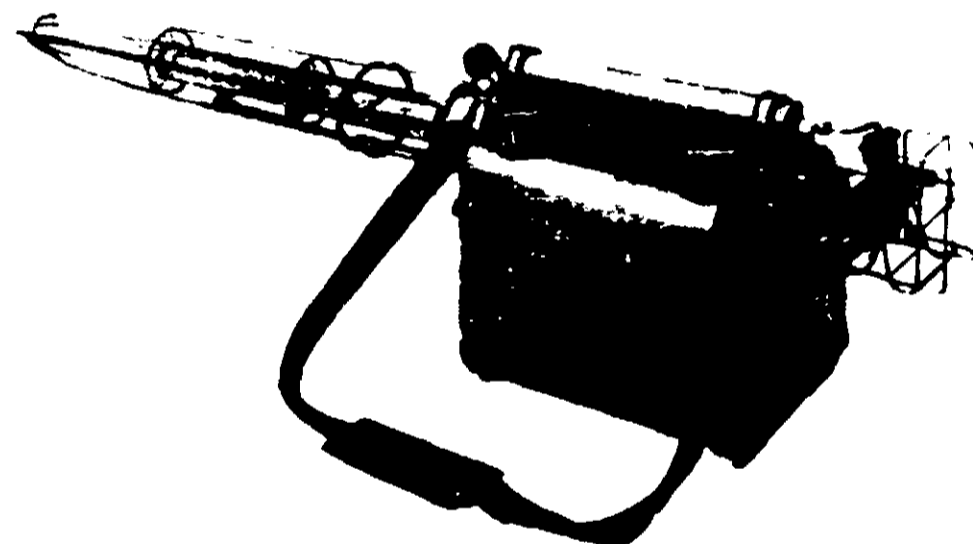

Revised 6/68

DIRECTIONS

EXCELCIDE PG SPACE SPRA is designed for control of small flying insects such as Flies, Gnats, Mosquitoes, and Flying Moths such as the adult Mediterranean Flour Moth, Indian Meal Moth, and Angoumois Grain Moth.

Spray EXCELCIDE PG Space Spra into entire room, after closing off all air current. Spray should be directed upward at wall and ceilings so that as many insects as possible can be contacted with a direct vapor or mist. EXCELCIDE PG SPACE SPRA can be applied by means of an electric, portable fogging device, such as the Dyna Fog, Challenger, Microfog, or BVI Foggers.

Room should be kept closed at least ten minutes after spraying. Repeat as often as necessary to keep named insects under control. Periodic spraying of EXCELCIDE PG Space Spra assists in the control of new infestations of named insects. Sweep up all dead and dying insects and destroy them at the close of the ten (10) minute period.

ACTIVE INGREDIENTS 100%

Petroleum Distillate
Technical Piperonyl Butoxide*
Pyrethrins

*Consists of (butylcarbityl)
(6-propylpiperonyl) ether and related compounds.
