THE HUGE COMPANY, Inc.

EXCELCIDE INSECTICIDES, RODENTICIDES AND EQUIPMENT

Sanitation Consultants to the Food Industry

884-886 HODIAMONT AVENUE St. Louis 12, Mo.

DIRECTIONS

sure all food and food processing surfaces are covered.

To control existing roach infestations and to WATERBUGS protect against roach reinfestations in food processing plants and warehouses, apply Diazinon-Pyrethrins Spra over surfaces thoroughly and into cracks and crevices. Make sure ALL breeding sites and harborages are wetted down with the insecticide.

To kill ants and silverfish, spray as outlined above, but also apply to wall and floor surfaces over which these insects are known to crawl.

Spray until glistening wet, but not running. Repeat treatment as required.

For outdoor use around food processing plants against flies, mosquitos, flying moths - spray outside surfaces of screens, doors, window frames or wherever these insects may enter the building.

Residual application is best applied under low pressure with a residual tank-type sprayer, fitted with a fan-pattern nozzle.
