

**EXCELCIDE BIRD REPELLENT**  
 Excelcide Bird Repellent will rid your premises of noisy, filthy birds without actually harming the birds. It is a sticky compound, which after application to ledges and sills, will discourage birds from roosting or returning to the treated surfaces for several months without harming the birds.

**DIRECTIONS**

**EASY TO APPLY.** Application is easiest when applied at a temperature above 60 degrees. This product is available in bulk or in caulking cartridges. In bulk form, application can be made with a putty knife, spatula, or an ordinary table knife, although best application can be achieved by filling a bulk-type cartridge gun. Apply with bulk-type or cartridge-type caulking gun, keeping nozzle close to surface in a 1/8 in. wide continuous strip along edges usually gripped by birds when landing (top edges of gutters, roofs, fences, signs and iron work, both edges of rafters, nesting areas). Wide surfaces (window sills and wall tops) will require several parallel strips starting 1/2 in. from edges and spaced about 1 1/2 in. apart.

NET WEIGHT

**EXCELCIDE<sup>™</sup>**  
**BIRD**  
**REPELLENT**

**CAUTION:**

Keep out of reach of children.

**ACTIVE INGREDIENTS 100%**

Polybutenes	95%
Polyethylene	5%

MANUFACTURERS OF

EXCELCIDE INSECTICIDES, RODENTICIDES AND EQUIPMENT  
 884-886 HODIAMONT AVE. • ST. LOUIS, MISSOURI 63112

Allow 1 inch to 2 inch spaces between strips for sparrows and starlings; 3 inches for pigeons. Excelcide Bird Repellent will adhere to any dirt-free building surface, metal, wood, brick, stone, plastic. For cornices or other projections, apply a line every 3 inches. On thin signs, roof ridges, structural iron work, apply a single line. Apply to outer edges of gutters and on the top of elbows of down-spouts in a single line. Apply around chimneys in a single line to prevent birds from forming nests.

Contents of Excelcide Bird Repellent caulking cartridge covers approximately 25 linear feet. Bulk form covers approximately 50 linear feet per pound of material.

**DO NOT MIX WITH OTHER MATERIALS.**

For  
**PIGEONS, STARLINGS,**  
**and SPARROWS**

A unique compound birds find tacky and disagreeable underfoot
