

DIRECTIONS

This material is preferably used in a tank-type sprayer, such as the EXCELCIDE Deluxe Tank-Type Sprayer with a fan pattern nozzle, at the rate of about one gallon per 1,000 square feet. Apply only as a spot application. If the product is used in any food processing areas, spray only when the food processing plant or other facility is not in operation. All food processing surfaces and equipment should be covered during the treatment to avoid contamination. The product should not be sprayed or fogged into food products. Foods should be removed or covered during application.

It should be applied anywhere from once a week to once every 3 weeks, depending on conditions and prevalence of insects.

It is designed particularly for crawling insects, such as cockroaches, silverfish, firebrats, and such stored product pests as the exposed stages of Confused Flour Beetles, Sawtoothed Grain Beetles, and Cadelles.

For control of the above-named insects and flying insects (Houseflies, Gnats, exposed Grain Moths, flying Moths, Drosophila) thorough residual application to walls, floors and baseboards so as to keep the named insects from penetrating into the food processing area or food storage areas.

EXCELCIDE DIAZ-A-VAP is designed for use inside such buildings as dairies, bakeries, food storage warehouses, bottling plants and buildings used for processing foods for human consumption.

ACTIVE INGREDIENTS 100%

Petroleum Distillate	98.50%
*O,O-diethyl O-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate	1.00%
**2,2-Dichlorovinyl dimethyl phosphate	.46%
*Related compounds	.04%

*Diazinon
*Vapona Insecticide (R)

USDA Registration No. 2270-X

fish and wildlife. Keep
out of lakes, streams, and
ponds. Apply only as
specified on this label.

THE HUGE[®] COMPANY, INC.
884-886 Hodiarnont Avenue
St. Louis, Mo. 63112

EXCELCIDE DIAZ-A-VAP

EXCELCIDE DIAZ-A-VAP is a combination residual-contact spray designed to kill exposed stages of crawling insects at the time of the residual treatment as well as to deposit a lethal residual crystalline film that will continue to kill crawling insects it contacts for several days after application.

This new formula incorporates the new Vapona Insecticide, which produces a high vapor or fumigant-like action which effects the particularly effective initial kill at the time of application. It has a tendency to seep into cracks and crevices.

CAUTION

Harmful if swallowed, inhaled, or absorbed through the skin. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, water or foodstuffs. Keep out of reach of children. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal. Avoid contact with skin, eyes, or clothing. Avoid breathing of spray mist.

NOTICE

The Huge[®] Company, Inc. makes no warranty expressed or implied concerning this material except that it conforms to the chemical description on the label. Neither the Huge[®] Company, Inc. nor the seller shall be held responsible in any manner for any personal injury or property damage or other type of loss resulting from the handling, storage or use of this material. The buyer assumes all risks and liability therefrom and accepts and uses this material on these conditions.
