

DIRECTIONS

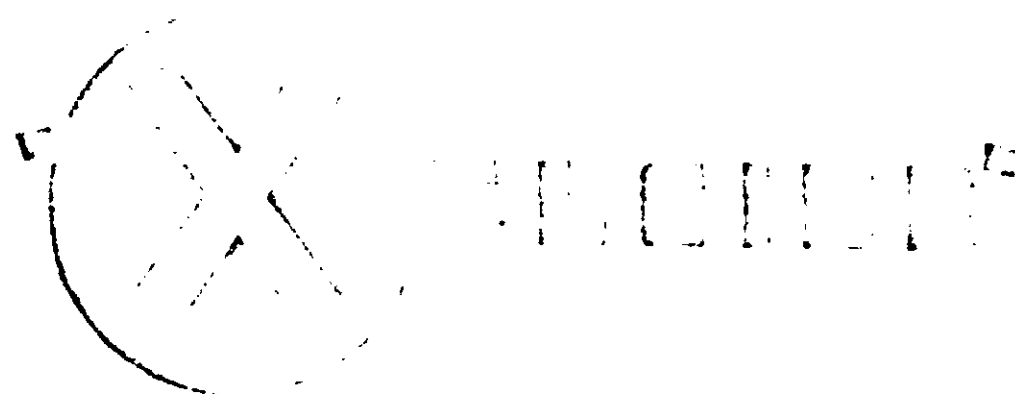

DE KALB - EXCELCIDE WALL AND FLOOR TREATMENT SPRAY is a ready-to-use residual insecticide requiring no dilution. It should be applied like paint to walls and floors and exteriors of equipment before introduction of hybrid seed into the plant and warehouse to kill the exposed larvae and pupae of Angoumois Grain Moths and Indian Meal Moths.

All wall and floor surfaces should be covered, preferably two or three times, before the introduction of seed into the building. The interval between treatments should be two to three weeks.

Application can best be made by using a low pressure, garden type sprayer such as the EXCELCIDE residual tank type sprayer with a fan pattern nozzle, applying at the rate of one gallon of spray to 100 square feet of wall and floor area until the surfaces glistening with liquid.

Efficient application and disposal of vapors. Following treatment, keep away from vapors. Control vapors by opening doors or by burning the vapors.

U. S. Pat. No. 2,415,322

**DE KALB -
WALL AND FLOOR TREATMENT SPRAY**

For Hybrid Seed Warehouses and Plants
Formulated of Korlan (Ronnel) and Vapone

**FOR INDUSTRIAL
USE ONLY**

DE KALB - WALL AND FLOOR TREATMENT SPRAY is a ready-to-use residual insecticide requiring no dilution. It should be applied like paint to walls and floors and exteriors of equipment before introduction of hybrid seed into the plant and warehouse to kill the exposed larvae and pupae of Angoumois Grain Moths and Indian Meal Moths.

CAUTION: Harmful if swallowed, inhaled, or absorbed through skin. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, water or foodstuffs. If swallowed, induce vomiting and get medical attention. Avoid prolonged contact with skin. Avoid prolonged inhalation of spray mist. Wash thoroughly after using. Keep away from heat and open flame.
