

[2270-99]

DIRECTIONS

EXCELCIDE Space Spra is designed for control of small flying insects: Flies, Gnats, Mosquitoes, and Flying Moths (adult Mediterranean Flour Moth, Indian Meal Moth, and Angoumois Grain Moth).

Spray EXCELCIDE Space Spra into entire room, after closing off all air current. Spray should be directed upward at walls and ceilings so that as many insects as possible can be contacted with a direct vapor or mist. EXCELCIDE Space Spra can be applied by means of an electric, portable fogging device, such as the Dyna Fog, Challenger, Microsol, or BVI Foggers. Apply at the rate of one ounce per 1000 cu. ft. Room should be kept closed at least ten minutes after spraying. Repeat as often as necessary to keep named insects under control. Periodic spraying of EXCELCIDE Space Spra assists in the control of new infestations of named insects. Sweep up all dead and dying insects and destroy them at the close of the ten (10) minute period.

CAL. NO. 912-68-SM

"EXCELCIDE" SPACE SPRA

CAUTION: Keep out of reach of children.

(See side panel for additional cautions)

ACTIVE INGREDIENTS

Petroleum Distillate	90.20%

Technical Piperonyl Butoxide	1.50%
Pyrethrins	0.30%

*Equivalent to 1.2% (butylarbityl-6-propyl-piperonyl) ether and 3% related compounds

THE HUGE COMPANY, INC.
Sanitation Consultants to the Food Industry
MANUFACTURERS OF

EXCELCIDE INSECTICIDES, RODENTICIDES AND EQUIPMENT

884-886 HODIAMONT AVENUE • ST. LOUIS MISSOURI 63112

DIRECTIONS

EXCELCIDE Space Spra is designed for control of crawling insects: Ants and Silverfish, and stored product pests: Confused Flour Beetles, Red Flour Beetles, Rice Beetles, Caddis, Saw-Toothed Grain Beetles, Dermestid Beetles, and Carpet Beetles, in their accessible stages. Thoroughly clean all flour, grain, and food dusts from horizontal surfaces, since these static accumulations encourage stored product pest breeding.

Spray EXCELCIDE Space Spra with permanent spraying installations, portable electric sprayers, or foggers, as mentioned above, applying to walls, floors, baseboards, wall floor junctures, window sills, doorway areas, and storage areas. Spray outside of storage sacks before storing. Spray box cars and store rooms before filling with grain, feed, or food products. Repeat at regular intervals or as often as necessary to control the named insects. Apply at the rate of one ounce per 1000 cu. ft., giving emphasis to directly contacting as many insects as possible.

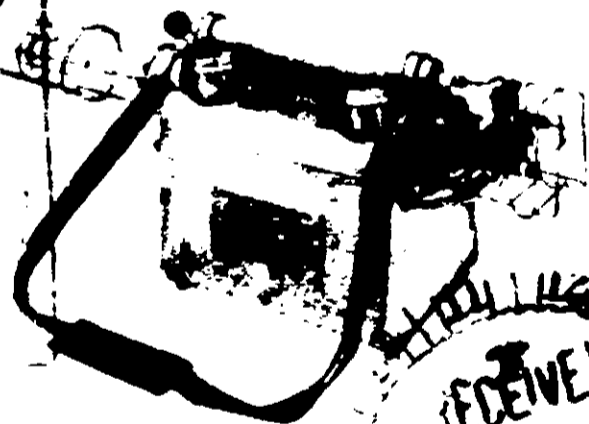

EXCELCIDE Space Spra is ideal for control of American, German, and Oriental Cockroaches. Spray as directed above for crawling insect control, directly contacting as many insects as possible.

CAUTION HARMFUL IF SWALLOWED.

Use the product in food processing plants only when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. Do not remain in treated area. Ventilate the area after treatment is completed. Do not use or store near heat or open flame.

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies. EPA Reg. No. 2270-99

RECORDED

Classified by Underwriters' Laboratories, Inc. as to fire hazard only. EXCELCIDE Space Spra is classed 20 to 25 between Paraffin oil and kerosene in respect to fire hazard. See UL index of classified products.

Infested stored food products, should be fumigated or treated by other effective methods using an accepted product intended for this purpose.
