DIRECTIONS

EXCELICIDE STOKELY-VAN CAMP FORMULA No. 333 is a residual-contact insecticide designed for control of crawling insects such as German Cockroaches, American Cockroaches, Brown Banded Cockroaches, Silverfish, Firebrats, Ants, and Spiders. This ready-to-use product features Dieldrin plus synergized pyrethrins and will kill such flying insects as flies, gnats, moths, *Drosophila* and mosquitoes.

To control crawling insects such as those named above, thoroughly clean cracks and crevices, and then apply EXCELICIDE Stokely-Van Camp Formula No. 333 to areas where insects are likely to breed, such as walls, floors, baseboards, ceilings, cabinet shelves, doors and window frames, overhead pipes, shipping areas such as docks and platforms, cracks and crevices and similar hiding places. For control of ants, spray ants, and trails and areas where they travel and window sills and frames where they nest. For control of flying insects such as flies, gnats, moths, thoroughly clean areas to be sprayed and then apply EXCELICIDE STOKELY-VAN CAMP FORMULA No. 333 to areas where this type insect breeds, such as walls, floors, baseboards, shelves, closets, ceiling baseboards, cabinet shelves, door and window frames, overhead pipes, shipping areas such as docks and platforms, cracks and crevices and similar hiding places.

This formula should be applied at the rate of one gallon per 1,000 sq. ft. of surface being sprayed.

For exteriors, spray EXCELICIDE STOKELY-VAN CAMP FORMULA No. 333 on outside walls, sidewalks, mats and window sills. Repeat application as often as necessary.

A ready-to-use residual-contact insecticide featuring Dieldrin plus synergized pyrethrins for the control of certain flying and crawling insects.

FOR INDUSTRIAL USE ONLY

**STOKELY-VAN CAMP
FORMULA No. 333**

W. H. SLOAN & COMPANY, INC.

MANUFACTURERS

Sanitation Consultants to the Food Industry

334 B26 HODGSON AVENUE
St. Louis 12, Mo.

See label on label, Van Camp Formula No. 333. If applied as directed, a residual deposit will continue to kill the majority of the insects contacting it for several days following the initial application. It should be applied when necessary whenever insect infestations reappear or as protection at regular periodic intervals.

ACTIVE INGREDIENTS 100%

Petroleum Distillate
0,0 Dimethyl 0-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate*
Technical Piperonyl Butoxide**
Pyrethrins

*Dieldrin, U.S. Patent No. 2754243

**Consists of (butylcarbitol)(6-propylpiperonyl) ether and related compounds.

CAUTION

Harmful if swallowed. Avoid prolonged breathing of spray mist. Avoid prolonged or repeated contact with the skin. Wash thoroughly after using and before eating or smoking. Use when food processing plant is not in operation. All processing surfaces and equipment should be covered during treatment to avoid contamination. Foods should be removed or covered. Not intended for household use. Do not use near flame. Antidote is antidotal.

NOTICE

Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
