### IMPORTANT NOTICE

GENERAL DIRECTIONS: Pour contents into a dry container. next to burrows, in runways, or in locations where rats and mice are accustomed to feeding, drinking or travelling. Desirable bait placements are along walls, in corners, and in concealed locations where rats and mice can feed unobserved. Replace stale, damp or moldy bait with fresh bait as necessary. Continue baiting until all signs of feeding have stopped.

This rodenticide contains as its active ingredient an anticoagulant chemical that reduces the clotting ability of the blood. Upon repeated feedings, it causes fatal hemorrhage in rats and mice. Bait should be placed in locations not accessible to children, pets or domestic animals, or in tamper proof bait boxes.

RATS: Use 4 or more ounces of bait at each location and maintain an uninterrupted supply of bait for at least 10 days.

MICE: Place tablespoon amounts (¼ to ½ ounce) of bait in shallow containers at 8-10 foot intervals and maintain an uninterrupted supply of bait for at least 15 days.

ELCIDE"

PIVAL PELLET

KILLS RATS AND MICE

**ACTIVE INGREDIENT:** 2-Pivalyl-1, 3-indandione\* . . . . . . . . .

INERT INGREDIENT: \*Also known as Pivaly!

**CAUTION:** 

Keep out of reach of children.

(See additional cautions on side panels)

Manufactured for

Sanitation Consultants to the Food Industry **MANUFACTURERS OF** 

EXCELCIDE INSECTICIDES, RODENTICIDES AND EQUIPMENT 884-886 HODIAMONT AVE. • ST. LOUIS, MISSOURI 63112

ACCEPTED

CAUTION: Baits should be placareas not accessible to childen, pets, wildlife and do-THE FEDERAL INSECTION Mestic animals, or in tamper-proof bait boxes.
