

CONTROL OF INSECTS
(air)
CONTROL BOMB 12 INCHES AWAY FROM OBJECTS SPRAYED

CONTROL OF FLIES, MOSQUITOES, GNATS, CEREAL MOTHS, FLYING MOTHS, FRUIT FLIES, and certain other insects.--Close all doors and windows in the room and spray upward, throughout the room, at a rate of 3 to 6 seconds per 1,000 cubic feet of space. Be sure to spray into cracks and other dark areas where insects are apt to hide. After spraying keep room closed for 24 hours.

CONTROL OF EXPOSED STAGES OF WEEVILS, CONFUSED FLOUR BEETLES, CADELLES and certain other insects in flour mills and food processing plants. May be used to spray screening doors, conveyors, elevators, when not in use, but double the quantity as directed above. Fogging machine should be used. Spray heavy fog into all hiding places, cracks and crevices, behind and under all objects in rooms, and directly on all insects seen. Repeat treatment as necessary.

CONTROL OF FLIES, GNATS, FLYING MOTHS in food plants, dairies, bakeries, grocery stores, schools and institutions, spray upward throughout the closed room or area whenever flying insects are a problem and just before closing for the day.

CONTROL OF ROACHES, WATERBUGS, ANTS, FLEAS, CRICKETS, SILVERFISH and certain other crawling insects, use double the quantity as directed above. Spray heavy fog into all hiding places, cracks and crevices, behind and under all objects in room, and directly on all insects seen. For control of ants, emphasis should be placed on the treatment of ant trails along door sills and window frames where the pests enter the premises. Repeat as necessary.

Do not use in enclosed spaces.
Do not use in confined spaces.
Do not use in enclosed spaces.
Do not use in enclosed spaces.
Do not use in enclosed spaces.

Do not set or store on radiators, stoves, or any place where temperature will exceed 130° F.
