EXCELCIDE REST-A-PEST NO. 114 FOR USE IN DYNA FOG MACHINES

IMPORTANT: Read this section first

DILUTION INSTRUCTIONS: To prepare this concentrate product for use dilute 1 part concentrate to 60 parts fuel oil or kerosene. For best results, it is recommended that only the amount of diluted product required per application be mixed.

AGITATE THOROUGHLY BEFORE USING

AFTER DILUTION, FOLLOW THESE DIRECTIONS: For control of flying insects either inside or outside - Drosophila gnats (Vinegar and Fruit Moths) and for such crawling insects as cockroaches, confused flour beetles, ants, cadellies, silverfish, carpet beetles that would be exposed at the time of application.

RECOMMENDATIONS: Most effective inside fogging of food processing plants, and insides of structures normally found on works, golf courses, and outdoor theatres, is accomplished during dry weather. External openings to building should be closed with exception of probably one providing an updraft. All parts of building or enclosure should receive equal concentration of fog. Exposed foods should be guarded by proper protective cover with temporary relocation.

Do not use in areas where operator may inhale the fog. Do not use in areas where children or pets may be exposed to the fog. Do not use in areas where the fog may be inhaled by the operator.

Do not use in areas where the fog may be inhaled by the operator. Do not use in areas where the fog may be inhaled by the operator. Do not use in areas where the fog may be inhaled by the operator.

EXCELCIDE REST-A-PEST NO. 114

FOR USE IN THERMAL-TYPE GENERATORS SUCH AS THE DYNA FOG MACHINE FOR CONTROL OF CERTAIN CRAWLING AND FLYING INSECTS

A concentrate to be diluted with oil.
(See dilution instructions on side panel.)

ACTIVE INGREDIENTS 100%

Petroleum Distillate
Technical Piperonyl Butoxide*
Pyrethrins

*Consists of n-butylcarbityl-(6-propyl)-peronyl ether and related compounds

CAUTION: KEEP OUT OF REACH OF CHILDREN

(See side panel for additional cautions)

THE HUGE COMPANY, INC.

Sanitation Consultants to the Food Industry

MANUFACTURERS OF

EXCELCIDE INSECTICIDES, RODENTICIDES AND EQUIPMENT
884 886 HODIAMONT AVE. • ST. LOUIS, MISSOURI 63112

DIRECTIONS: For outdoor fogging, the areas to be treated (parks, golf courses, outdoor theatres) and the areas immediately adjacent to structures normally found in the above areas and around food processing plants buildings should be completely covered with visible fog at a rate of about 2 1/2 gals. per acre. The same amount of indoor treatment, although in the latter no more than 1 gal. of diluted insecticide per 50,000 cubic feet should be applied, and the particle size of the insecticide should be 10 microns. Machine is adjustable for these uses. Repeat application should be effected as often as is necessary.

Spray EXCELCIDE REST-A-PEST NO. 114 upward at walls and ceiling so that as many insects as possible can be contacted with direct mist. After spraying, sweep up all dead and dying insects, and destroy them. Periodic spraying assists in control of new batches of named insects, thereby reducing infestation.

CAUTION: Harmful if swallowed. Do not contaminate or store near food or foodstuffs. Do not use in food processing plants when plant is not in operation. All food processing surfaces should be thoroughly cleaned before use. Do not reuse containers. Destroy when empty. This product is not intended for household use. **DO NOT USE, POUR, FILL OR OPEN NEAR HEAT OR OPEN FLAME.** Do not remain in treated areas, and ventilate the area after treatment is completed.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water during cleaning of equipment or disposal of waste.
