DIRECTIONS FOR USE

Space Spray to Kill Flies, Mosquitoes, Small Flying Moths and Gnats: Cover or remove exposed food and food handling surfaces. Close room and shut off all air conditioning or ventilating equipment. Apply with mechanical or compressed air sprayer, or with fogger which gives small particle size. Direct spray upwards toward upper corners of room and ceiling. Apply at the rate of 0.5 to 1.0 fluid ounce per 1000 cu. ft. of space to be treated. Leave room closed for one-half hour. Ventilate room thoroughly before re-entry. Repeat as necessary for insect control.

Contact or Surface Spray to Kill Roaches, Waterbugs, Crickets and Ants: Cover or remove food before application as described under space spray. Apply with a sprayer that gives large wetting droplets. Force spray into cracks and crevices in walls and floors, along baseboards and other insect harborages. Use one gallon of spray per 1000 square feet of surface to be treated. For ants, spray trails and all points of entry into the building. Spray ant nests directly with a soaking application. In all cases contact as many insects as possible directly with the spray. Repeat applications as necessary for control.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not apply directly to food - follow directions given above for covering or removing food, utensils and food processing surfaces. Do not apply while food processing is underway. Clean thoroughly all food processing or storage surfaces before re-use.

Do not re-use empty container. Perforate or crush and bury in a safe place.
