INERT INGREDIENTS	80.00%	

*MCK Insecticide Sp. List 204
**Equivalent to 0.4% (1-allylcarbamyl)(6-propylpiperonyl) ether and .12% related compounds.

HOLD THE BOMB 18 IN HAND AWAY FROM OBJECT SPRAYED FOR CONTROL OF FLIES, MOSQUITOES, GNATS, COMMON MOTHS, FLYING MOTHS, FRUIT FLIES, and certain other flying insects--Close all doors and windows in the room and spray upward, throughout the area, at the rate of 4 to 6 seconds per 1000 cu. ft. of space. Be sure to spray into corners and other dark areas where insects are apt to hide. After spraying, keep room closed for 15 minutes. One 1-lb. cylinder will effectively treat 1000 cu. ft. of space for control of flying insects.

FOR CONTROL OF EXPOSED STAGES OF WHEATLEAS, CONFUSED FLOUR BEETLES, AND CADELLES in food processing plants. Use to spray screening equipment conveyors, elevators, when not in use, but double the quantity as directed above for flying insects should be used. Spray heavy fog into all hiding places, cracks and crevices, behind and under all objects in rooms, and directly on all insects seen. Repeat as often as necessary. Do not use in flour mills.

FOR CONTROL OF FLIES, GNATS, FLYING MOTHS in food plants, dairies, bakeries, grocery stores, and institutions, spray upward throughout the closed room or area whenever flying insects are a problem and just before closing for the day.

FOR CONTROL OF ROACHES, WATERBUSS, ANTS, FLEAS, SPICKETS, AND SILVERFISH use double the quantity as directed above. Spray heavy fog into all hiding places, cracks and crevices, behind and under all objects in room, and directly on all insects seen. Sleeping quarters of pets should be treated for flea control. One 1-lb. cylinder will effectively treat 200 sq. ft. of surface.

WARNING: Contents under pressure. Do not set on stoves, radiators, or any place where temperature will exceed 100° F. Do not puncture container or throw into fire. Do not spray directly on exposed food. Keep out of reach of children. Food should be removed during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.
