

WINCIDE[®] ROACH KILLER

DIRECTIONS

FLIES, MOSQUITOES, WASPS and BEES: For outdoor use only as an aid in reducing annoyance from these pests. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garages and other places where these insects alight or congregate. In case of wasps, spray nest after dark when insects have returned to the nest. Repeat often since insecticidal residues on outside of buildings tend to deteriorate quite rapidly.

BROWN DOG TICKS: Thoroughly spray infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of household pets and localized areas of floors and floor coverings. Applications should be repeated as infestations warrant and as re-infestations occur. Fresh bedding should be placed in animal quarters following treatment. Do not treat animals with this formulation.

CAUTION

Harmful if swallowed. Keep out of reach of children. Avoid contamination of feed and foodstuffs. Avoid breathing spray mist and skin contact. In case of contact with skin, wash with soap and water. Do not use on household pets or humans.

COMBUSTIBLE MIXTURE: Do not use, pour, spill or store near heat or open flame.

NOT FOR USE ON PLANTS.

DO NOT REUSE CONTAINER.

DESTROY CONTAINER WHEN EMPTY.

ACCEPTED

APR 06 1973

UNDER THE FEDERAL INSECTICIDE, FUNGICIDE AND ROACH KILLER ACT FOR ECONOMIC POISON REGISTERED UNDER NO. 228576 SUBJECT TO ATTACHED COMMENTS

Roaches, water bugs, ants, flies, mosquitoes, spiders, wasps, flying moths, silverfish, carpet beetles, crickets, brown dog ticks.

CAUTION: Keep Out of Reach of Children

See additional cautions on side panel. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

NET CONTENTS

U.S. GALLONS

ACTIVE INGREDIENTS:

99.52% by Wgt.

Petroleum Distillate
Piperonyl Butoxide, Technical*
O,O diethyl O (2-sopropyl-4-methyl-6-primidinyl) phosphorothioate**
Pyrethrins

*Consists of (Butylcarbityl) (6-Propylpiperonyl) Ether and related compounds.

**DIAZINON is a registered trademark of Geigy Chemical Corp.

INERT INGREDIENTS:

0.48% by Wgt.

Essential Oil

WINCIDE[®] ROACH KILLER

DIRECTIONS

When properly applied, this product will produce a residual coating. Surfaces on which insects crawl or alight should be thoroughly treated with a coarse spray until glistening wet, yet not running. Treatment should be repeated as often as necessary to maintain effective control.

This insecticide may be used with a hand, compression, mechanical or electric sprayer. Also may be used in fogging devices outdoors.

ROACHES, RESISTANT ROACHES, WATER-BUGS, SPIDERS, CRICKETS and SILVERFISH: Spray heavily into all cracks and crevices, along baseboards, around floor drains, behind and underneath cabinets, sinks, refrigerators, stoves, etc. Spray around window frames and door sills, pipes, harborages, breeding sites and wherever insects run, nest or hide. Repeat as often as necessary to maintain effective control.

ANTS: Thoroughly spray ant trails, ant hills and areas around door sills and window frames where pests might enter. It is frequently desirable to treat the openings around water pipes, heat ducts, electrical outlets and baseboards where ants come into the room from wall spaces and partitions. Repeat as necessary.

SILVERFISH: Spray baseboards, areas behind shelving, book cases and storage areas. Repeat as necessary.

CARPET BEETLES: Make localized application to areas of the floor and baseboards. Spray into cracks and under carpets where insects may be found. Repeat as necessary.

ROACH KILLER

When properly applied, this product will produce a residual coating. Surfaces on which insects crawl or alight should be thoroughly treated with a coarse spray until glistening wet, yet not running. Treatment should be repeated as often as necessary to maintain effective control.

This insecticide may be used with a hand, compression, mechanical or electric sprayer. Also may be used in fogging devices, out doors.

ROACHES, RESISTANT ROACHES, WATER-BUGS, SPIDERS, CRICKETS and SILVERFISH: Spray heavily into all cracks and crevices, along baseboards, around floor drains, behind and underneath cabinets, sinks, refrigerators, stoves, etc. Spray around window frames and door sills, pipes, harborage, breeding sites and wherever insects run, nest or hide. Repeat as often as necessary to maintain effective control.

ANTS: Thoroughly spray ant trails with this product around door sills and window frames where pests might enter. It is highly desirable to treat the perimeter around water pipes, hot and cold water pipes and baseboards where ants commonly travel from water leaks and other sources.

SILVERFISH: Spray heavily into all cracks and crevices, around floor drains, behind and underneath cabinets, sinks, refrigerators, stoves, etc.

FREE BEEFLES: Make a coarse spray of the formulation and apply it to cracks and other spots where they may be found. Repeat as necessary.
