PINE OIL
DISINFECTANT

PHENOL COEF.
3
A.C.A.C. METHOD

Conforms to U.S. Commercial Standard CS 69-38

ACTIVE INGREDIENTS 90%
STEAM DISTILLED PINE OIL VEGETABLE OIL SOAP

INERT INGREDIENT: WATER, NOT MORE THAN 10%

Disinfectant - Deodorant - Germicide - Cleaner

A powerful, pleasant disinfectant, deodorant, and germicide.
Guaranteed to be 3 times stronger than pure Carbolic Acid when
tested against B. typhosus (typhoid germ) by the A.C.A.C.
Method.

Because of its pleasing odor, Pine Oil Disinfectant is admirably
adapted for use in Hotels, Banks, Public Institutions, Office
Buildings and the home, as a disinfectant and deodorant.

CAUTION

KEEP OUT OF REACH OF CHILDREN
UNDILUTED PRODUCT MAY CAUSE SKIN IRRITATION
See side panel for additional cautions.

DIRECTIONS FOR USE

CUSPIDORS: A solution of three ounces of Pine Oil Disinfectant
to a gallon of water will aid in deodorizing and disinfecting
cuspidors. Leave this mixture standing in the cuspidors.

Always put Pine Oil Disinfectant in pail first and then add
the water.

It is instantly soluble in water in which it forms a creamy
milk-white emulsion which does not separate on standing.

Every batch of Medlex Pine Oil Disinfectant is tested for
germicidal strength in a modern bacteriological laboratory
---but before the tests are made the raw materials are checked
in our chemical laboratories and the finished product is then
double checked.

The following table will assist in obtaining accurate dilutions:

- 1½ ounces with 1 gallon makes 1% solution
- 2½ ounces with 1 gallon makes 2% solution
- 4 ounces with 1 gallon makes 3% solution
- 6½ ounces with 1 gallon makes 5% solution

CAUTION

AVOID CONTACT WITH SKIN, EYES, OR CLOTHING. IN CASE OF CONTACT,
IMMEDIATELY FLUSH SKIN OR EYES WITH PLENTY OF WATER. FOR
IRRITATED EYES, GET MEDICAL ATTENTION. SCRUB SKIN THOROUGHLY
WITH SOAP AND WARM WATER.

LEFT PANEL

FLOORS: When mopping or scrubbing use 3 ounces of Pine Oil Disinfectant to each gallon of water in the bucket.

GENERAL DISINFECTING: Remove all filth and dirt from the premises and use a solution of one part of Pine Oil Disinfectant to 60 parts of water. This mixture acts as a disinfectant against B. typhosus.

TOILET ROOMS, WATER CLOSETS AND URINALS: Wash the closet and urinal bowls regularly with a solution made of $\frac{1}{2}$ cupful of Pine Oil Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

GARBAGE: To aid in preventing the breeding of flies and certain other vermin, sprinkle with the solution in the proportion of four ounces of Pine Oil Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

In the typhoid sick room, in the sanitization of beds, clothes, utensils, typhoid stools, rooms and the hands of those typhoid patients, disinfectant should be used in the proportion of 3 oz. to each gallon of water.
