WATER

WATER

Commercial Standard - 69-48

Distilled line oil, Vegetable oil soap

water not more than

Disinfectant - Deodorant - Germicide - Cleaner

powerful, pleasant disinfectant, deodorant, and germicide.
Guaranteed to be 10 times stronger than pure Carbolic Acid when
used against typhoid (typhoid germ) by the U.S. Army.

Useful in hospitals, homes, in all infected or admirably
suitable for use in schools, banks, public institutions, office
buildings, etc., to disinfect and deodorize.

For additional cautions,
see instructions on the label.

Directions: A solution of 2 1/2 ounces of the oil disinfectant
to a gallon of water will aid in deodorizing and disinfecting
surfaces. Leave this mixture standing in the corridors.

Always mix the oil disinfectant in rail first and then add
the water.

It is instantly soluble in water in which it forms a creamy
milk-white emulsion which does not separate on standing.

Every batch of Medley's line oil disinfectant is tested
for germicidal strength in a modern bacteriological laboratory
---but before the tests are made the raw materials are checked
in our chemical laboratories and the finished product is a
double checked.

The following table will assist in obtaining the proper dilution:

- 1 1/2 ounces with 1 gallon water
- 2 1/2 ounces with 1 gallon water
- 3 1/2 ounces with 1 gallon water
- 4 1/2 ounces with 1 gallon water
