

LAWNS: Apply the contents of this bag, 25 lbs., on 5,000 sq. ft. Do not skip or lap use a spreader for even application. Make the application in early Spring, before weed seeds get

TO CONTROL POA ANNUA (Annual Bluegrass) - - Apply the contents of this bag, 25 lb., on 3,300 sq. ft., in Mid August or September.

NEWLY SEEDED LAWNS: 1. 100% green cover after the second cutting.

ORNAMENTALS: The floral 22" can be easily used on more than 100 species of trees and shrubs, and both indoors and outdoors, some of which are:

[illegible]

Ask for a complete list of these. Broadcast evenly the contents of this bag (25 lbs.) on 5,000 sq. ft. For mulch, spread 1 lb. on 100 sq. ft. Apply before weed seeds germinate in the Spring, or immediately following a cultivation to remove existing weeds anywhere in the year. A light watering, or a moderate rainfall following application, insures optimum results. DO NOT DISTURB the soil after treatment.

DO NOT APPLY ON THESE PLANTS:

Buena Vista	Germanirder	Elfin
Butter pink	Geum	Grand Victoria
Carnation	Desemby in the sun	Heliochrysa
Delhendia	Pansy	

CAUTION: KEEP OUT OF REACH OF CHILDREN

Do not smoke or drink only

Wolfe, L. and L. R. Boy. 1983. *Field guide to the birds of the United States*. 3rd ed. New York: McGraw-Hill.

Let $\mathcal{A} = \{A_1, \dots, A_n\}$ be a family of n sets.

1. *Importance of the study* – why is it important?

Let $\mathbf{y}_1, \mathbf{y}_2, \dots, \mathbf{y}_n$ be an arbitrary set of n vectors in $\mathbb{R}^m$. Then

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 10-year-old children. The study was conducted in a primary school in the city of Ankara, Turkey. The children were divided into two groups: a control group and an experimental group. The experimental group participated in a 12-week training program that included aerobic, strength, and flexibility exercises. The control group did not participate in any training program. The physical fitness of the children was measured at the beginning and end of the 12-week period. The results showed that the experimental group had significantly higher levels of physical fitness than the control group at the end of the 12-week period. The findings suggest that a 12-week training program can improve the physical fitness of 10-year-old children.

Do not remove container from bag, add to container,
