

Shoo Roach Killer Powder when applied in dry areas will provide long lasting control of roaches, ants and silverfish. The powder clings to vertical and horizontal surfaces and adheres to the insect. When applied according to the directions, Shoo Roach Killer Powder will control the roach population in 7 to 10 days.

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

#### FOR USE IN RESIDENCES AND RESTAURANTS:

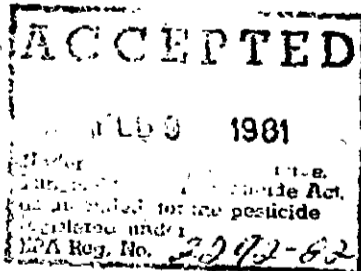

Shake well before using. Apply powder liberally with a teaspoon in all areas where roaches, ants and silverfish frequent. These areas are: under sinks, along baseboards, cracks, under stoves, refrigerators, showers, tubs, into openings around drain and water pipes, and other inaccessible areas. Any powder visible after application should be carefully brushed into cracks and crevices or removed.

Should roaches reappear in the future, reapply according to the directions. It is recommended that areas should be treated once a year.

Do not apply in edible products areas of food-processing plants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

#### FOR USE IN NEW CONSTRUCTION

Apply powder with a powder or hand operated duster to insure penetration into hidden areas and open voids. Use approximately 1 lb. of powder for an average size room.
