MAIN PANEL SUPER CONCENTRATED STABILIZED SLOW
DISSOLVING SWIMMING POOL CHLORINATING
2 OZ. TABLETS

SUPER CONCENTRATED STABILIZED
SLOW DISSOLVING SWIMMING POOL
CHLORINATING MINI TABLETS

W.S.A. 11/67

J.R.C.

2292-90

Protects against bacteria and algae
Stabilized for extended chlorine life
slow dissolving
totally soluble

Active ingredients:

Trichloro-s-triazinetrione	79
Inert ingredients	1
Available Chlorine	69

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves or only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID: (PRACTICAL TREATMENT)

If swallowed: Feed large amount of milk and/or water and induce vomiting. Call a physician immediately.

If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

If inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS

DANGER: Strong oxidizing agent. Use only clean, dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as lit cigarette. Do not use in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion. Do not come in contact with plastic pool linings or other objects. Do not throw directly into pool.

2. PRODUCT: SUPER CONCENTRATED STABILIZED SLOW DISSOLVING SWIMMING POOL CHLORINATING 2 OZ. TABLETS

ENVIRONMENTAL HAZARD:

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the regional office of EPA.

ADDITIONAL POOL CARE RECOMMENDATIONS:

pH — Maintaining pH in the ideal range of 7.2-7.6 is extremely important to the efficacy of your chlorine and swimming comfort. Test for pH often with a suitable test kit. Adjust pH as necessary, using products such as pH Minus or pH Plus.

SUPPERCHLORINATION — Superchlorination with a calcium hypochlorite product such as Burn Away Shock Treatment and Super Chlorinator is recommended to burn out the organic material your filter can't handle and keep your water sparkling clear. Use as directed on the label, especially during excessive heat, when bathing loads are high, when water becomes dull looking or hazy, when there is a "chlorine" like smell or excessive eye irritation or after heavy rains.

SHOCK TREATMENT — If algae appear, shock treat your pool with a calcium hypochlorite product such as Burn Away Shock Treatment and Super Chlorinator. Follow label directions. An alternate method is to put 7-2 Oz. Tablets (approx. 14 oz.) in the skimmer for each 10,000 gallons of water. Run pump and filter until totally dissolved (approx. 11 days). Thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. Pool should not be used until chlorine residual is from 1.0-2.0 ppm.

REFERENCE POOL CAPACITY:

Rectangular Pools: Multiply length x width x average depth x 7.5 = pool capacity (U.S. gallons) Round pools: Multiply radius (1/2 diameter) x radius x average depth x 23.5 = pool capacity (U.S. gallons).

CHLORINE CHLOROXINOL STABILIZED SLOW DISSOLVING
WISNIPOL 100% CHLORINATING 2 OZ. TABLETS

Do not use in skimmers, skimmers or filters. (Do not add directly into skimmer, avoid metal objects. Use only in skimmer or feeder which has been thoroughly cleaned. Do not mix with other chemicals in skimmer or feeder.)

CHLORINE CHLOROXINOL

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. 2 Oz. Tablets, containing 89% available chlorine, are designed to dissolve in swimming pools. The tablets control growth of algae and effectively kill many bacteria thus helping to keep the pool in a sanitary condition.

If any chlorine residual is present, it is possible to increase the residual in pool water by approx. 1.4 ppm by using 1-2 Oz. Tablet per 10,000 gallons of water.

For best results, place tablets in the feeder following the manufacturer's directions or into a dissolving basket, floating container or the plastic leaf strainer of the surface skimmer. Do not permit tablets to contact plastic pool furniture or metal objects. Do not throw Tablets directly into the pool.

1.0

For a pool with no visible algae, bring chlorine residual to 1.0-1.5 parts per million (ppm) as follows:

1. For each 10,000 gallons of water, put 1-2 Oz. Tablet in a plastic leaf strainer in the surface skimmer.
2. Wait until tablet is totally dissolved (approx. 14 days). An alternate method is to use Burn Away Shock Treatment for start up. Follow label directions.
3. Test for chlorine residual using a suitable test kit.
4. If chlorine residual is below 1.0 ppm, add one 2 Oz. Tablet per 10,000 gallons, wait until dissolved and check residual. Burn can be used when residual is between 1.0 and 3.0 ppm.
5. One day after the pool's chlorine residual reaches 1.0-1.5 ppm, use cyanuric acid (e.g. Conditioner and Stabilizer) to stabilize your pool. Follow label directions. Adjust pH to the ideal range of 7.2-7.6.

10 TABLETS PER OZ. HIGHLY CONCENTRATED STABILIZED SLOW DISSOLVING
SWIMMING POOL CHLORINATING 2 OZ. TABLETS

An alternate procedure is to use quick Dissolving Stabilized granular Swimming Pool Chlorinator to achieve an initial chlorine residual of 1.0-1.5 ppm. Follow label directions for start up and then follow Step 5 above.

Regular Care - Place 10 tablets in feeder following feeder manufacturer's directions. Alternately, place 1-2 Oz. Tablet in a skimmer or floater for each 10,000 gallons of water, or as needed to maintain the pool's chlorine residual from 1.0-1.5 ppm.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place. **EMERGENCY HANDLING:** In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.
