Ready to use

Digital

BLOXROT-R is effective for termite control, both pre- and post-infestation.

EXCELLENT FOR TERMITE CONTROL

Use for both interior and exterior work and control water repellent to control shrinkage.

DIRECTIONS

BLOXROT-R is an emulsion to be applied to wood surfaces with brush, sprayer or pump. For wood work, treat all surfaces of wood, including end grain. For masonry, treat all surfaces of masonry.

Apply to wood surfaces before any painting or staining is completed. Before BLOXROT-R is applied, the surface must have been treated with BLOXROT-R until it has dried for 48 hours.

Estimated coverage: 5 to 10 gallons per thousand square feet for spot treatment; 500 square feet per gallon for brush application.
