## C-Z 75

**C-Z 75** is a wettable powder concentrate containing neutral copper and zinc primarily for use on citrus against certain diseases and against copper and zinc nutritional deficiencies, as directed below.

### DIRECTIONS FOR USE

Use contrary to these directions may result in injury to foliage or fruit, in unsatisfactory control or in other unintended consequences.

**CITRUS** — Use 13 pounds per 500 gallons of spray (2.6 pounds per 100 gallons). For concentrate sprays increase proportionately. Sift into tank when one-half to two-thirds filled with water. Have agitator running when filling to insure adequate mixing.

**DORMANT** — Against Scab on citrus and against nutritional deficiencies of copper and zinc, apply just before growth appears, usually late January or early February. When infection is severe increase concentration of spray by fifty percent.

**POST BLOOM SPRAY** — Against Scab, Melanose, and to supply nutritional copper and zinc, apply one to two weeks after petal-fall. Spray thoroughly to cover all twig and leaf areas, being particularly careful to cover the topmost parts of trees.
