## CATTLE "BUTT" BAG

Product No.  
3-1107-3

### DIRECTIONS FOR USE

**IMPORTANT:** Read these entire Directions and Conditions of Sale before Using FASCO CATTLE "BUTT" BAG.

#### LOUSE AND HORN FLY CONTROL:

Suspend FASCO CATTLE "BUTT" BAG in areas frequented by cattle or in gateways or lanes through which the animals pass daily for water, feed or mineral. Bags may also be suspended in loafing sheds or in front of protected mineral feeders. For lactating dairy cows, FASCO CATTLE "BUTT" BAG may be suspended in the exit through which cows leave the milking barn. In all cases, the dust bags should be adjusted so that the bottom of the bag will hang four to six inches below the topline of the cattle.

#### INSTALLATION OF FASCO CATTLE "BUTT" BAG:

Suspend the dust bags by inserting rope, chain, or wire through the grommets at the top of the bag and attaching to an overhead structure or by hooking the grommets into hooks fixed to a stationary overhead 2 x 4 at the height recommended for horn fly control. In areas of frequent or heavy rainfall, FASCO CATTLE "BUTT" BAG should be protected from the weather.

Install as many 10 pound FASCO CATTLE "BUTT" BAGS as necessary in lanes or other openings to assure proper dusting of the animals. After the bags are in place, pull the rip cord to allow the insecticide to fall into the bottom of the bag. When dust bags are provided on a free-choice basis, allow one 10-pound FASCO CATTLE "BUTT" BAG per 10 to 20 animals.

### (CATTLE DUST BAG)

FOR CONTROL OF LICE AND HORN FLIES ON BEEF AND DAIRY CATTLE.

\*Contains ® CO-RAL (or coumaphos)

ACTIVE INGREDIENTS	BY WT.
