BORER SPRAY

GRO-TONE BORER SPRAY is a water emulsifiable concentrate insecticide for use against boring insects attacking tree trunks.

DIRECTIONS: Mix at rate of $6\frac{1}{2}$ tablespoons per gal. of water, 1 cup per $2\frac{1}{2}$ gals., or 1 pint per 5 gals.

Pine Trees—Against Ips Beetles, Black Turpentine Beetles, and Southern Pine Beetles, apply as a coarse wetting spray from soil line as far up trunk as you can reach. Make application at first indication of reddish dust in bark crevices and holes in bark. Additionally, spray exposed roots of attacked pines and nearby fresh pine stumps. Repeat after 30 days as needed. Spot treat bark areas around highest attacks of Black Turpentine Beetles as successive attacks occur higher on the trunks.

Oaks. Dogwood, Cherry Laurel. Wild Plum, Ornamental Peach Trees — Against Flatheaded Borers, Red Oak Borers, Peachtree Borers, apply as a coarse wetting spray to the tree trunks. Squirt the spray solution deep into the burrows with an oil can and seal holes.

CAUTION: Harmful if swallowed. May be

absorbed through skin. Avoid breathing spray mist. Avoid contact with skin. In case of contact, immediately wash with soap and water. Avoid contamination of feed and food-stuffs. Do not apply to soil where edible root crops will be planted. Keep out of reach of children.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME

DANGER TO FISH AND WILDLIFE: This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Do not contaminate any body of water by direct application, cleaning of equipment or disposal of wastes and containers.

CONTAINER DISPOSAL: Do not re-use the container. Destroy when empty by burying with wastes away from water supplies.

conditions of SALE: All statements concerning the use of this product apply only when used as directed. The manufacturer makes no warranties, expressed or implied, concerning this product or its use, which extend beyond the description on the label. Read all directions carefully.
