PROTECT FROM EXCESSIVE HEAT
STORE IN A COOL, DRY PLACE

DIRECTIONS FOR USE

Kerr-McGee Soybean Special with Molybdenum is especially formulated for treatment of soybean seed to control seed and soil-borne diseases, including damping-off, seed decay organisms and seedling blights and to provide essential molybdenum for plant growth where soils have been found to be deficient in available molybdenum. It is prepared for use directly in the planter box, thereby eliminating additional seed handling to have seed treated.

Manufactured by
Kerr-McGee Chemical Corp.
Oklahoma City, Oklahoma
U.S.D.A. Registration No. 9132-63

This material provides adequate coverage of seed and any excess flows with the seed into the furrow, giving additional protection against soil-borne diseases.

Do not use treated seed for food, feed, or oil purposes.

Use this product as a planter box seed treatment at the rate of 3 to 4 ounces per bushel (4 pecks) of seed. Plant soybeans at the rate of at least 3/4 bushel (3 pecks) per acre.

Planter box rates are as follows:

Size of Planter Box	Number of 1 oz. scoops per planter box
1/2 bushel (2 pecks)	1-1/2 to 2 scoops
1 bushel (4 pecks)	3 to 4 scoops
1-1/2 bushels (6 pecks)	4-1/2 to 6 scoops

NOTICE

The Kerr-McGee Chemical Corp. and the seller guarantees the material sold to be true to the label. Further than that, it makes no representation or warranty, and it shall not be held responsible for any injury to crop, soil, person, or property, resulting from the use or handling of said material, whether used in accordance with directions or not. The buyer and/or user accept this material subject to the above conditions of sale.
