POTATO SEED-PIECE FUNGICIDE DUST
For control of Fusarium Decay on Seed Potatoes.
(Contains Dithane M-45)*

ACTIVE INGREDIENTS.

A co-ordination product of zinc and
manganese ethylenebisdithiocarbamate..... 8%

INERT ingredients..... 92%
100%

GENERAL INFORMATION:

Potato Seed-Piece Fungicide Dust is a special fungicide dust
formulation for application on whole or cut potato tubers to
protect them from seed-piece decay caused by Fusarium Sambucinum.

DIRECTIONS FOR USE:

Use 1 pound of Potato Seed-Piece Fungicide Dust per 100 pounds
of whole or cut potato seed-pieces. Apply the dust in a manner
such that the entire surface of the seed-piece becomes thoroughly
covered with the fungicide dust. Plant seed as soon after treat-
ment as possible. Do not use treated seed potatoes for food or
feed purposes.

CAUTION:

KEEP OUT OF REACH OF CHILDREN

May cause irritation of nose, throat, eyes, and skin. Do not
breathe dust or spray mist. In case of skin contact wash with
water; for eyes, wash copiously with water and get medical
attention. Do not reuse containers. Destroy by burning with
waste.

Contamination of fish-bearing waters with this product may harm
fish.

IMPORTANT: Keep away from fire and sparks. Store in a cool,
dry place. Do not allow to become wet or overheated in storage.
This may bring on chemical changes which will impair the fungi-
cidal effectiveness of Dithane M-45 and may also generate
flammable vapors. Keep container closed when not in use.
