BACK PANEL (CARDBOARD BACKING)

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: This collar is intended for use as an insecticide generator and is not to be taken internally by man or animal. Not intended for use on humans. The insecticide in this collar is a cholinesterase inhibitor. Do not allow children to handle or play with this collar.

Note to Physicians/Veterinarians: Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

Do not use on cats less than one year old. Do not use other pesticides on cat while collar is worn. Some cats and humans may be sensitive to this collar. Remove at first sign of irritation or adverse reaction. Do not use on sick or convalescing animals. Do not use on Persian cats. Adjustable - will accommodate up to a 12" neck size.

DIRECTIONS FOR USE

It is a violation of Federal law to use this collar in a manner inconsistent with its labelling.

Place Protection[™] 150 Reflecting collar around the cat's neck, adjust for proper fit and buckle in place. Cut off and dispose of excess length. The collar must be worn loosely so that two fingers can be placed between collar and cat's neck. If collar is worn too tightly, it may produce neck irritation. Activity against fleas starts within 24 hours, reaches maximum effectiveness in 3-4 days and continues as long as the collar is worn (up to 150 days). Ticks are relatively harder to kill and die more slowly. Activity against ticks will occur within a few days and will continue killing and controlling ticks for up to 150 days. Fleas and ticks present in the animal's environment that may reappear on the cat will be killed and controlled by the action of the collar. THE REFLECTIVE STRIP ON THIS COLLAR WILL REFLECT BRIGHTLY WHEN AN OUTSIDE LIGHT SOURCE, SUCH AS CAR HEADLIGHTS, SHINE DIRECTLY ON IT. Replace collar when effectiveness diminishes. Collar is not affected by normal wetting such as rainfall; however, it is suggested the collar be removed before bathing.

DISPOSAL

Do not reuse empty blister. Wrap blister and put in trash collection. When discarding used collar, wrap in newspaper and place in trash collection.
