Back of carton

PREVENTEF® Flea and Tick Collar for Dogs with EFA

Adjustable - fits dogs, up to 28" neck size

PRECAUTIONARY STATEMENTS (optional)
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: This collar is intended for use as an insecticide generator and is not to be taken internally by man or animal. Not intended for use on humans. The insecticide in this collar is a cholinesterase inhibitor. Do not allow children to handle or play with this collar. May cause contact sensitization following repeated contact with skin in susceptible individuals. Avoid repeated contact with skin. If sensitization reactions result, contact a physician.

Note to Physicians/Veterinarians: This product contains a cholinesterase inhibitor. Atropine sulfate and 2-PAM are antidotal only if signs of cholinesterase inhibition are present.

Do not use other cholinesterase-inhibiting drugs, pesticides or chemicals on dog while collar is worn. Some dogs and humans may be sensitive to this collar. Remove at first sign of irritation or adverse reaction. Do not use on sick or convalescing dogs. Do not use on puppies less than 5 weeks of age.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this collar in a manner inconsistent with its labeling.

Place PREVENTEF® collar around the dog's neck, adjust for proper fit and buckle in place. Cut off and dispose of excess length. The collar must be worn loosely so that two fingers can be placed between collar and dog's neck. If collar is worn too tightly, it may produce neck irritation. Activity against fleas starts within 24 hours, reaches maximum effectiveness in 3-4 days and continues as long as the collar is worn (up to 150 days). Ticks are relatively harder to kill and die more slowly. Activity against ticks will occur within a few days and will continue killing and controlling ticks for up to 150 days. For unusually large breeds, collar aids in tick control in the head and neck area for up to 2 months. Fleas and ticks present in the animal's environment that may reappear on the dog will be killed and controlled by the action of the collar. Replace collar when effectiveness diminishes. Collar is not affected by normal wetting such as rainfall; however, it is suggested the collar be removed before bathing.

This PREVENTEF® collar contains Essential Fatty Acids necessary for healthy skin and hair. Unsaturated fatty acids released from the collar are rapidly absorbed to help maintain a lustrous, manageable coat.

DISPOSAL

Do not reuse empty pouch or box. Wrap pouch or box and put in trash collection. When discarding used collar, wrap in newspaper and place in trash collection.
