Zone Control: To effectively control fleas, you should treat the areas where fleas live with the Flea Stop^x 4-Step Program which consists of, Step 1 -Shampoo/Dip the Pet; Step 2 -Treat the Home and Yard; Step 3 -Flea and Tick Collar on the Pet; Step 4 - Maintenance Sprays and Powders. Ask your pet care professional for specific recommendations on how to best control fleas for the comfort and well-being of your pet and family.

PROTECTIONtm 150 Flea and Tick Collar for Cats
Adjustable - will accomodate up to a 12" neck size.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESIC ANIMALS

CAUTION: This collar is intended for use as an insecticide generator and is not to be taken internally by man or animal. Not intended for use on humans. The insecticide in this collar is a cholinesterase inhibitor. Do not allow children to handle or play with this collar. May cause contact sensitization following repeated contact with skin in susceptible individuals. Avoid repeated contact with skin. If sensitization reactions result contact a physician.

Note to Physicians/Veterinarians: Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

Do not use other cholinesterase inhibitng pesticides, drugs or chemicals on cat while collar is worn. Some cats and humans may be sensitive to this collar. Remove at first sign of irritation or adverse reaction. Do not use on sick or convalescing animals. Do not use on Persian cats.

DIRECTIONS FOR USE

It is a violation of Federal law to use this collar in a manner inconsistent with its labelling.

Place Protectiontm 150 collar around the cat's neck, adjust for proper fit and buckle in place. Cut off and dispose of excess length. The collar must be worn loosely so that two fingers can be placed between collar and cat's neck. If collar is worn too tightly, it may produce neck irritation. Activity against fleas starts within 24 hours, reaches maximum effectiveness in 3-4 days and continues as long as the collar is worn (up to 150 days). Ticks are relatively harder to kill and die more slowly.

BEST AVAILABLE COPY

Activity against ticks will occur within a few days and will continue killing and controlling ticks for up to 150 days. Fleas and ticks present in the animal's environment that may reappear on the cat will be killed and controlled by the action of the collar. Replace collar when effectiveness diminishes. Collar is not affected by normal wetting such as rainfall; however, it is suggested the collar be removed before bathing.

DISPOSAL

Do not reuse empty pouch or box. Wrap pouch and box and put in trash collection. When discarding used collar, wrap in newspaper and place in trash collection.
