PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed, absorbed through skin or inhaled, causes moderate eye irritation. Avoid breathing vapors or spray mist and contact with skin, eyes or clothing. In case of contact, flush with plenty of water. Avoid contamination of food or foodstuffs. Do not spray plants used for food or feed. Keep pets and children out of treated area until after spray has dried. Do not spray on animals.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Do not induce vomiting because of aspiration pneumonia hazard.

IF IN EYES: Flush with plenty of water. Get immediate medical attention.

IF INHALED: Remove victim to fresh air or, if not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

IF ON SKIN: Wash skin with soap and warm water after use. Get medical attention if irritation persists.

IF ON CLOTHING: Remove contaminated clothing and wash before re-use.

ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to fish and aquatic invertebrates. Do not apply directly to water. Drift from treated areas may be hazardous to organisms in adjacent aquatic sites. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

To kill fleas and ticks harboring in lawns, backyards, dog kennels and runs, apply Yard Spray Concentrate through the hose end sprayer provided with this product or by compressed air sprayer or watering can. For best results, lawn should be mowed a day or two before spraying.

For Use with Hose End Sprayer Applicator: The hose end applicator cap is calibrated to deliver the correct dilution rate, and when attached to this bottle will treat 6000 square feet. To treat smaller areas, stop spraying when the appropriate amount of concentrate has been used (e.g., half the concentrate should be used for a 3000 square foot yard), reclose bottle with original cap and store bottle for next application. Separate mixing of the concentrate or other application equipment is not required. First ensure the hose faucet is turned off. Then screw end of hose into the black end of the sprayer cap. Remove bottle cap (save for closing after use). Secure sprayer cap to bottle by turning bottle counter-clockwise. Turn on faucet. Spray using a slow, even sweeping motion, being sure to cover the entire lawn surface where pets frequent. Spray under ornamentals and trees but avoid soaking young or flowering plants. Flea populations are greatest where the pet spends most time. Therefore be sure to thoroughly soak these areas (e.g., shaded areas such as under bushes, trees, porches, inside pet kennel and wherever your pet frequents). Repeat treatment may be necessary at 7 to 14 day intervals.

For Compressed Air Sprayer or Watering Can Application: Mix two (2) fluid ounces of the concentrate per one (1) gallon of water and apply at the rate of one (1) gallon of diluted spray per 1000 square feet to surfaces of kennels, exercise runs, patios, on and under porches, crawl spaces and other outdoor areas pets frequent.

STORAGE AND DISPOSAL

STORAGE: Store in closed container in a cool, dry place.

DISPOSAL: Do not reuse empty container. Wrap container in newspaper and discard in trash.
