

 U.S. ENVIRONMENTAL PROTECTION AGENCY Office of Pesticide Programs Registration Division (H7505C) 401 "M" St., S.W. Washington, D.C. 20460	EPA Reg. Number: 2382-156	Date of Issuance: NOV 12 1997
	Term of Issuance: Conditional	
	Name of Pesticide Product: Permethrin- Pyriproxyfen Residual Shampoo For Dogs #2	
NOTICE OF PESTICIDE: <u> X </u> Registration <u> </u> Reregistration (under FIFRA, as amended)		
Name and Address of Registrant (include ZIP Code): Virbac Inc. P.O. Box 162059 Fort Worth, TX 76161		
Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.		
On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others. This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you: 1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4. 2. Make the following label changes: a. Revise the EPA Registration Number to read, "EPA Reg. No. 2382-156". b. Add the statement, "Do not use on puppies under 3 months of age.", to the label. c. Change the retreatment interval from 10 days to 14 days.		
Signature of Approving Official: <i>See page 2</i>	Date: <i>November 12, 1997</i>

**PERMETHRIN-PYRIPROXYFEN RESIDUAL*
SHAMPOO FOR DOGS #2**

[Permethrin immediately kills fleas and ticks,
including ticks that transmit the organism that causes
Lyme Disease].

[Permethrin continues to repel and kill fleas for 9
days and ticks for 20 days]

[Pyriproxyfen IGR, Nylar®, sterilizes all new fleas
and kills their eggs for 8 weeks]

ACTIVE INGREDIENTS:

Permethrin [(3-phenoxyphenyl) methyl
(+)-cis, trans-3-(2,2-di-chloroethenyl)
-2,2-dimethylcyclopropanecarboxylate]..... 1.0%

Pyriproxyfen: 2-[1-methyl-2-(phenoxy-
phenoxy)ethoxy] pyridine..... 0.05%

INERT INGREDIENTS..... 98.95%

TOTAL..... 100.00%

*Cis/trans ratio: Max. 55% (+) cis

Min. 45% (+) trans

CAUTION

KEEP OUT OF REACH OF CHILDREN

See back panel for additional precautionary statements

READ ENTIRE LABEL BEFORE EACH USE USE ONLY ON DOGS
PRECAUTIONARY STATEMENT HAZARDS TO HUMANS AND
DOMESTIC ANIMALS CAUTION Do not treat puppies under 8 weeks
of age. Some dogs may be sensitive to ingredients in this product. If
dog shows adverse effects, bathe with a non-pesticidal shampoo and
consult veterinarian if reaction persists or becomes more severe. Wash
hands with soap and water after using.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner
inconsistent with its labeling.

Pyriproxyfen and permethrin, in this special formulation*, are adsorbed
onto, and stick tightly to hair and skin, even after complete rinsing, to
provide long term residual efficacy against fleas and ticks. New fleas
are repelled and killed for 9 days and ticks for 20 days after bathing.
Lyme Disease ticks are also repelled and killed before they can feed
and transmit disease. The insect growth regulator (a synthetic flea
hormone), pyriproxyfen, sterilizes all fleas that jump onto the pet (even
new fleas before they start laying eggs) and therefore kills all flea
eggs. This action persists for 8 weeks and breaks the flea's life cycle
by preventing the development of new fleas in the pet's environment
and the build-up of reinfestation pressure.

Because of the residual activity of the ingredient, it is not necessary
to use an insecticidal dip or other topical or systemic pesticides or
drugs to obtain extended control of fleas and ticks. The use of this
shampoo on a regular basis, alone or in conjunction with initial
environmental flea control measures (if needed), should suffice to
provide complete and continuous effective flea and tick control on
dogs.

APPLICATION: Wet the pet thoroughly with warm water. Apply product
onto its back at the rate of approximately 1 tablespoonful for each 5
lb. bodyweight (7.5 g per kg). Massage well into the skin to obtain good
lathering over the entire body. Allow lather to remain in contact for at
least 10 minutes then rinse off. Allow pet to air dry or blow dry. Under
flea and tick reinfestation pressure from the dog's environment, pet
may be retreated as needed when new parasites are seen to persist on
the dog, but not more frequently than once every 10 days.

STORAGE AND DISPOSAL DIRECTIONS

STORAGE: Store in closed container in a cool dry area.

DISPOSAL: Do not reuse empty container. Wrap container and put in
trash.
