virbac®

**PYRIPROXYFEN-PERMETHRIN RESIDUAL*
SHAMPOO FOR DOGS #3**

Permethrin immediately kills fleas and ticks,
including ticks that transmit the organism that
causes Lyme Disease.

Permethrin continues to repel and kill fleas for up
to 9 days and ticks for up to 20 days after
shampooing

Nylar® IGR sterilizes all fleas (and kills their
eggs) for up to 3 months after shampooing

ACTIVE INGREDIENTS:

Permethrin [(3-phenoxyphenyl) methyl (±)-cis, trans-3-(2,2-di-chloroethenyl) -2,2-dimethylcyclopropanecarboxylate].....	1.0%
Pyriproxifen: 2-[1-methyl-2-(phenoxy- phenoxy)ethoxyl]pyridine.....	0.25%
INERT INGREDIENTS.....	98.75%
TOTAL.....	100.00%

*Cis/trans ratio: Max. 55% (±) cis
Min. 45% (±) trans

CAUTION

KEEP OUT OF REACH OF CHILDREN

See back panel for additional precautionary statements

EPA Reg. No. 2382- EPA Est. No. 2382-IN-1

Net Wt. 8 fl. oz. (237 mL)

**READ ENTIRE LABEL BEFORE EACH USE USE ONLY ON DOGS
PRECAUTIONARY STATEMENT HAZARDS TO HUMANS AND
DOMESTIC ANIMALS CAUTION** Do not treat puppies under 8 weeks
of age. Some dogs may be sensitive to ingredients in this product. If
dog shows adverse effects, bathe with a non-pesticidal shampoo and
consult veterinarian if reaction persists or becomes more severe. Wash
hands with soap and water after using.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner
inconsistent with its labeling.

Pyriproxifen and permethrin, in this special formulation*, are adsorbed
onto, and stick tightly to hair and skin, even after complete rinsing, to
provide long term residual efficacy against fleas and ticks. New fleas
are repelled and killed for up to 9 days and ticks for up to 20 days after
bathing. Lyme Disease ticks are also killed before they can feed and
transmit disease. The insect growth regulator (a synthetic flea hor-
mone), pyriproxifen, sterilizes all fleas that jump onto the pet (even new
fleas before they start laying eggs) and therefore kills all flea eggs. This
action persists for 3 months and breaks the flea's life cycle by prevent-
ing the development of new fleas in the pet's environment and the build-
up of reinfestation pressure. Because of the residual activity of the
ingredients it is not necessary to use an insecticidal dip or other topical
or systemic pesticides or drugs to obtain extended control of fleas and
ticks. The use of this shampoo on a regular basis, alone or in
conjunction with environmental flea control measures (if needed),
should suffice to provide complete and continuous effective flea and
tick control on dogs.

APPLICATION: Wet the pet thoroughly with warm water. Apply product
onto its back at the rate of approximately 1 tablespoonfull for each 5
lb. bodyweight (7.5 g per kg) Massage well into the skin to obtain good
lathering over the entire body. Allow lather to remain in contact for at
least 10 minutes then rinse off. Allow pet to air dry or blow dry. Under
flea and tick reinfestation pressure from the dog's environment, pet
may be retreated as needed when new parasites are seen to persist on
the dog, but not more frequently than once every 10 days.

STORAGE AND DISPOSAL DIRECTIONS

STORAGE: Store in closed container in a cool dry area.

DISPOSAL: Do not reuse empty container. Wrap container and put in
trash.
