96/10

Each 16/32 fl.oz bottle treats up to 250/500 square feet surface for 1 year.

PRECAUTIONARY STATEMENT HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Avoid contamination of food or feedstuffs. Do not apply directly to pets. Keep children and pets off treated surfaces until dry.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labelling.

KNOCKOUT™ FLEA & TICK CARPET SPRAY #1 contains an unique combination of ingredients that kills both adult and pre-adult fleas (before they grow up to bite). A single application immediately kills adult insects in your home and in the pet's environment and continues to kill these pests for up to 3 weeks. This provides an initial period of protection against preexisting insects, especially adult fleas and ticks, while the Nylar® (pyriproxyfen) Insect Growth Regulator goes to work to prevent development and kill immature stages of fleas that are already in the pet's environment. A single treatment with this product continues, for at least one year/ 12 months/365 days, to prevent all new fleas from developing in treated areas since pyriproxyfen kills all new flea eggs and immature fleas before they can become adult fleas. Protects your home from reinfestation and flea buildup and your pets and family from flea bites. Leaves no odor or mess and, used as directed, does not stain furnishings or fabrics. Treat by spraying surfaces, at the rate of approximately one squeeze of the trigger (1.9 mL) for each square foot. Spray all areas frequented by the pet, where most flea eggs accumulate and where flea larvae develop to provide a source of new fleas to reinfest your pet. Pay special attention to areas and surfaces where the pet spends most of its time and sleeps, including pet beds and bedding, areas of carpet, rugs and flooring, cracks and joints in wood flooring, and surfaces and crevasses of furniture. Also treat the inside kennels, upholstery and carpets of vehicles and boats used to transport pets. Use a registered Virbac flea and tick control product on your pets, in conjunction with this environment treatment, to achieve an integrated parasite control program.

STORAGE AND DISPOSAL

STORAGE: Store in a cool area. DISPOSAL: Do not reuse empty container. Wrap in several layers of newspaper and discard in trash.
