

U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:
2382-167

Date of Issuance:
APR 10 2001

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Term of Issuance:
Conditional

Name of Pesticide Product:
Pyrethrin-Pyriproxyfen
Residual Ovisterilant
Shampoo #2

Name and Address of Registrant (include ZIP Code):

Virbac Inc.
P.O. Box 162059
Fort worth, Texas 76161

Note: Changes in labeling affecting in substance those accepted in connection with this registration must be submitted to and accepted by the Administrator prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c) (7) (C) since you have agreed to the conditions set forth in the Agency's letter dated May 25, 2000 and modified in a meeting on June 7, 2000. Your letter dated June 8, 2000 confirms in writing your acceptance of the conditions.

Change the registration number to read EPA Reg No. 2382-167

Submit two copies of the finished printed label before the product is released for shipment.

If the conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6 (e).

A stamped copy of the label is enclosed for your records.

Signature of Approving Official:

Ann Sibold

 Gormley King Company

**READ ENTIRE LABEL BEFORE EACH USE. USE ONLY ON
DOGS AND CATS. PRECAUTIONARY STATEMENT
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Do not treat nursing puppies or kittens. Do not use on puppies
under 11 weeks of age and on kittens under 6 months of age.
Consult a veterinarian before treating pregnant, nursing, sick,
aged, debilitated or medicated dogs. Sensitivities may occur after
using any pesticide product on pets. If signs of sensitivity occur,
bathe pet with mild soap or a non-pesticidal shampoo and rinse
with large quantities of water. If signs continue consult a
veterinarian immediately. Wash hands with soap and water after
using.

STORAGE AND DISPOSAL DIRECTIONS

STORAGE: Store in closed container in a cool dry area.
DISPOSAL: Do not reuse empty container. Wrap container and
put in trash.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner
inconsistent with its labeling.

The dual synergized pyrethrins provide immediate killing of fleas
and ticks on the pet. Pyriproxyfen, in this special formulation±, is
absorbed onto, and sticks tightly to hair and skin, even after
complete rinsing. This insect growth regulator (a synthetic flea
hormone) sterilizes all fleas that jump onto the pet (even new fleas
before they start laying eggs) and therefore kills all flea eggs. This
action persists for 1 month and breaks the flea's life cycle by
preventing the development of new fleas in the pet's environment
and the build-up of reinfestation pressure. Shake well before
using. Wet the pet thoroughly with warm water. Apply product
onto its back at the rate of approximately 1 tablespoonful for each
5lb. bodyweight (7g per kg) for dogs and puppies and at 1 ¼
tablespoonful (8g per kg) for cats and kittens. Massage well into
the skin to obtain good lathering over the entire body. Allow lather
to remain in contact for at least 10 minutes then rinse off. Allow
pet to air dry or blow dry. To maintain effective flea life cycle
control (through IGR flea egg killing) repeat treatment at least
once every month. Under conditions of flea reinfestation pressure
from the environment, repeat treatment when new parasites are
seen on the pet, but not more frequently than once weekly on
dogs and twice monthly on cats.
