

Contents under pressure. Do not puncture. Do not store or use near heat or open flame, or while smoking. Exposure to temperatures above 120 F. may cause bursting. Never throw container into fire or incinerator.

Wash thoroughly, with soap and water after handling and before eating or smoking. Do not contaminate feed, water, or foodstuffs. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal. Avoid inhalation and skin contact.

When spraying, spray to wet surface thoroughly, but not so wet as to run or form puddles. Stay-Spray+ may be applied to most surfaces and fabrics. If in doubt as to any material, test a small area before proceeding. Avoid asphalt tile, plastics or synthetic materials. Allow treated surfaces to dry before touching, using or storing.

Container and contents made in U.S.A.

STAY- SPRAY+

THE HOUSEHOLD INSECTICIDE, USED BY PROFESSIONAL EXTERMINATING COMPANIES ---

STAY-SPRAY+ ALSO PROTECTS AGAINST INFESTATIONS OF ROACHES, CARPETS, CLOSETS AND CERTAIN OTHER PESTS

(See back panel for additional cautions)

| ACTIVE INGREDIENTS | |
|--|---------|
| Petroleum Distillate | 90.693% |
| *0,0-diethyl 0-(2-isopropyl-4-methyl-6-pyrimidinyl phosphorothioate | 0.500% |
| 2,2-dichlorovinyl dimethyl phosphate | 0.465% |
| related compounds | 0.035% |
| B-Thiocyanoethyl Ester of Mixed Fatty Acids containing 10 to 18 carbon atoms | 0.187% |
| B-Butoxy B'-Thiocyano Diethyl Ether | 0.059% |
| INERT INGREDIENTS | 8.061% |

Total 100.000%

Equivalent to Diazinon, a registered tradename of Geigy Agricultural Chemicals

DISTRIBUTED BY STAY CHEMICAL COMPANY — FLINT, MICHIGAN 48505

U.S.A. Reg. No. 2391-3

(Net Wt. 15 oz.)

DIRECTIONS

STAY-SPRAY+ EASILY KILLS COMMON HOUSEHOLD INSECTS; CARPET BEETLES OR BUFFALO MOTHS, ROACHES, WATERBUGS, ANTS, CRICKETS, CENTIPEDES, WASPS, SILVERFISH, SPIDERS, MOSQUITOES AND HOUSEFLIES . . . AND IT IS NOT EVEN NECESSARY TO SPRAY IT ON INSECTS TO GET EXCELLENT RESULTS . . . BECAUSE STAY-SPRAY+ WILL CONTINUE TO GIVE PROTECTION AFTER THE SPRAY HAS EVAPORATED.

Spray each surface so that, after drying, an effective protection will remain to kill insects that crawl over it. Allow two weeks for best results and if any insects still survive, re-treat the area where they are seen.

Spray only the area where insects appear. Treat localized areas of floors, under carpets, on shelves of closets, and in cracks, crevices, or hiding places where carpet beetles or buffalo moths may be found. May be applied to woodwork, on cracks, and surfaces, around water pipes, storage area, behind shelves, and wherever roaches, waterbugs, silverfish, crickets, centipedes and spiders run, hide or rest. For ants, treat window and door sills and ant trails. As an aid in the control of mosquitoes, wasps and flies, thoroughly and repeatedly spray outside surfaces of screens, doors, windows and selected area where they alight or congregate, as porch ceilings and around outside lights. Treatment for these insects with Diazinon should be limited to outdoor use. Repeat when necessary.
