Mr. Patrick Lavell
Stay Chemical Company
4100 West 54th Street
Mount Morris, MI 48458

Dear Mr. Lavell:

Subject: Amendment - Label Update and Confidential Statement of Formula
Stay Spray Liquid Pesticide
EPA Registration No. 2391-7
Your Application Dated December 3, 1986

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

1. Correct spelling of "phosphorate" to phosphorothioate in ingredient statement.
2. Please supply the upper and lower certified limits on all ingredients. We have enclosed a current Confidential Statement of Formula form for your convenience.
3. Consult Section 162.10(a)(2) of Title 40 of the Code of Federal Regulations (CFR) for type size, prominence, and legibility of words and statements on final printed labels. Enclosed is a copy of that part of the CFR.
4. Your storage and disposal statements should read as follows:

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container only, preferably in a locked storage area. Do not store in a manner where cross contamination with other pesticides, fertilizer, food or feed could occur.

OFFICIAL FILE COPY

If spilled during storage or handling, soak up spillage with absorbant material and dispose of in accordance with Pesticide Disposal instructions listed below.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse container, then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

- 5. The "petroleum distillate" and "aromatic petroleum derivative solvent" declarations should not be included in the active ingredient portion of the label since they are solvents and not active. Therefore, delete these from the active ingredients and add the percentages to the total of Inert Ingredients, i.e.,

Inert Ingredients 98.500%

Since these solvents may present an aspiration hazard if the product is ingested, add the phrase:

Contains petroleum distillates

beneath the ingredient statement, i.e.,

*Inert Ingredients 98.500%

*Contains petroleum distillates

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

CAUTION!

PRECAUTIONARY STATEMENTS

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.
2391-7

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

- Harmful if swallowed. May be absorbed through the skin.
- Do not breath spray mist. Do not get in eyes or skin or on clothing
- Wash thoroughly after handling.
- Avoid contamination of food and feed.
- Do not smoke when applying this product.
- Do not use on household pets or humans.
- Do not allow children or pets in treated areas until surfaces are dry.

FIRST AID (PRACTICAL TREATMENT)

- If swallow - Call a physician or Poison Control Center immediately
DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia.
- If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.
- If on skin - Remove contaminated clothing and wash affected areas with soap and water.
- If in eyes - Flush eyes with plenty of water. Call a physician immediately.

Page 2 of 2

Note to Physician: Solvent presents aspiration hazard.

Gastric lavage is indicated if material was taken internally. If symptoms of cholinesterase inhibition are present, atropine is antidotal. 2-PAM is also antidotal and may be used in conjunction with atropine.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Keep out of any body of water. Do not contaminate water by cleaning of equipment, or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

STAY-SPRAY LIQUID PESTICIDE easily kills common household insects; Carpet Beetles or Buffalo Moths, Roaches, Waterbugs, Ants, Crickets, Centipedes, Wasps, Silverfish, Spiders, Mosquitoes, Houseflies . . . and it is not even necessary to spray it on insects to get excellent results . . . because Stay-Spray Liquid Pesticide will continue to give protection AFTER the spray has evaporated.

Spray each surface so that, after drying, an effective protection will remain to kill insects that crawl over it. Allow two weeks for best results and if any insects still survive, re-treat the area where they are seen.

Spray only the area where insects appear. Treat localized areas of floors under carpets, on shelves of closets, and in cracks, crevices, or hiding places where carpet beetles or buffalo moths may be found. May be applied to woodwork, on cracks and surfaces, around water pipes, storage areas, behind shelves, and wherever roaches, waterbugs, silverfish, crickets, centipedes and spiders run, hide or nest. For ants, treat window frames and door sills and ant-trails. As an aid in the control of mosquitoes, wasps and flies, thoroughly and repeatedly spray outside surfaces of screens, doors, windows and selected areas where they alight or congregate such as porch ceilings and lights. Treatment for these insects should be limited to outdoor use only with this formulation. Repeat when necessary.

Do not apply as a space spray.

CONTAINER DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
