

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS. For control of Norway rats, Roof rats and House mice in and around homes, buildings, and similar man-made structures, and in transportation vehicles.

Treated baits must be placed in tamper-proof bait boxes or in locations not accessible to children, pets, domestic animals and wildlife. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

SELECTION OF TREATMENT AREAS: Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Protect bait from rain or snow. Remove as much food as possible.

APPLICATION DIRECTIONS

RATS: Apply 4 to 16 ounces of bait per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.

MICE: Apply 1/4 to 1/2 ounce (1-2 level tablespoons) of bait at 8 to 12 foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

RATS & MICE: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and unconsumed bait properly. To prevent reinfestation, eliminate food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

DISPOSAL

**DO NOT REUSE EMPTY CONTAINER.
WRAP CONTAINER AND PUT IN TRASH COLLECTION.**

ACCEPTED

NOV 10 1982

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended by the FIFRA Act of 1972, registered under EPA Reg. No. 2393-145

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Keep away from humans, domestic animals and pets. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding.

NOTE TO PHYSICIAN: If ingested, administer Vitamin K₁ intramuscularly or orally, as indicated in bishydroxycoumarin overdose. Repeat as necessary based on monitoring of prothrombin times.

ENVIRONMENTAL HAZARD

Keep Out of Lakes, Streams or Ponds.

READY MIXED, EASY TO USE — USE INDOORS AND OUTDOORS

PRODUCT DESCRIPTION

This rodenticide contains Warfarin, an anticoagulant chemical that reduces the clotting ability of the blood and upon repeated feedings, causes fatal hemorrhage in rats and mice.
