

RECOMMENDATIONS

SOYBEANS: Use Hopkins 25% Captan Seed Protectant at the rate of 4 oz. per bushel, or 7 oz. per 100 lbs. of seed as a planter box treatment.

PLANTER BOX RATES ARE AS FOLLOWS:

<u>SIZE OF PLANTER BOX</u>	<u>NUMBER OF 1 OZ. SCOOPS PER PLANTER BOX</u>
1/2 Bushel	2 Heaping Scoops
1 Bushel	4 Heaping Scoops

APR 10 1941

2370

DIRECTIONS FOR USE

Hopkins 25% Captan Seed Protectant is especially formulated for treatment of soybean seed for the control of seed and soil-borne diseases, including damping-off and seed decay organisms, and seedling blights, and is prepared for use directly in the planter box, thereby eliminating additional seed handling to have seed treated.

This material provides adequate coverage of seed and any excess flows with the seed into the furrow, giving additional protection against soil-borne diseases. May be used on previously treated seed.

Do not use treated seed for food, feed or oil purposes.
