**CAPTAN-MOLY B  
 PLANTER BOX SEED PROTECTANT**

For Use On Soybeans

Contains 15% Graphite (non-oily lubricant)

1 Ounce Measuring Cup Enclosed

ACTIVE INGREDIENTS:

Captan*	25.0%
INERT INGREDIENTS**	75.0%
TOTAL	100.0%

\*N [(trichloromethyl)thio]-4-cyclohexene-1, 2-dicarboximide

\*\*Contains the equivalent of 4.75% Molybdenum from sodium molybdate.

EPA Reg. No. 2393-260AA

EPA Est. No. 2393-WI-1

**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

**HARMFUL IF SWALLOWED, INHALED, OR ABSORBED THROUGH SKIN.** Avoid inhaling dust - wear respirator. Avoid contact with skin, eyes or clothing. Wash with soap and water after handling. Do not contaminate feed or food.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning equipment, or disposal of wastes and containers.

Container should be disposed by crushing and burying with wastes.

Protect from Excessive Heat. Store in a Cool, Dry Place.

READ ENTIRE LABEL. APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL.

**PRODUCT INFORMATION**

CAPTAN-MOLY B is especially formulated for planter box treatment of soybean seed. It protects sound and/or mechanically injured seed against seed and soil-borne diseases such as seedling blights, damping-off and seed decay organisms at planting time. It provides essential molybdenum for plant growth where soils have been found to be deficient in available molybdenum. Molybdenum helps the nodule bacteria and plants make more efficient use of nitrogen. Soybeans are most likely to benefit from treatment with this product when planted in acidic soil (soil needing liming), heavily leached soils, or soils high in iron content.

It is prepared for use directly in the planter box, thereby enabling the grower to avoid the additional handling or commercial seed treatment, thus lowering the percent of cracked or split seed planted.

A non-oily lubricant has also been added to help prevent cracking and splitting of the seed in the planter box so they will flow easily and evenly.

This material provides adequate coverage of seed and any excess flows with the seed into the furrow, giving additional protection against soil-borne diseases.

DO NOT USE TREATED SEED FOR FOOD, FEED OR OIL PURPOSES.

**RECOMMENDATIONS FOR USE**

Use CAPTAN-MOLY B as a planter box treatment at the rate of 4 ounces (4 heaping scoops) on the amount of seed that will be planted per acre so that the needed 1/2 oz. of Sodium Molybdate per acre will be applied. DO NOT OVERTREAT.

Mix HOPKINS CAPTAN-MOLY B with seed in drill box as follows: Fill the drill box half full of seed then add one-half recommended rate of CAPTAN-MOLY B and mix well by stirring with stick or paddle until uniform coverage is observed. Add remaining seed to drill box and cover with balance of CAPTAN-MOLY B Mix thoroughly as above.

For further specific information consult the State Agricultural Experiment Station or the State Agricultural Extension Service.

**NOTICE OF WARRANTY**

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
