

DIRECTIONS

NON-CROP AREAS

For use on Non-crop land such as Right-of-Ways, Industrial Plants, Lumber Yards, Tank Farms, Storage Areas, and Parking Lots for control of most annual and perennial grasses and broadleaved weeds. The effectiveness and length of time that control will last will depend on type of soil, amount of rain and other conditions.

RATE: Under ordinary conditions use at the rate of 7 to 14½ gallons per acre. Under conditions where weeds are difficult to control increase the rate to 22 gallons per acre. The Urox Liquid should be diluted in sufficient fuel oil, diesel oil, or aromatic weed oil to give good coverage (75 to 150 gallons per acre depending on density of vegetation). For spot treatment, use ¼ to ½ cupful (⅛ to ¼ pint) per 100 square feet diluted in 1 to 2 quarts of any of the above oils.

HOW TO APPLY: Use a sprayer which will distribute the required amount evenly over the area to be treated. Use a coarse spray to reduce drift. Application may be made when top growth is dense, but better control will be obtained when weeds are short or when excess growth is mowed and removed before applying.

WHEN TO APPLY: Best results will be obtained if applied shortly before or at the time plant growth begins. Rain or thorough watering after application will cause the material to move to the root zone and thus speed up control.

CAUTION!

HARMFUL IF SWALLOWED

IRRITATING TO SKIN AND EYES

Do not get on skin, in eyes or on clothing.

In case of contact, immediately wash skin with plenty of water: for eyes, wash with water for at least 15 minutes and get medical attention.

RATE: Under ordinary conditions use at the rate of 7 to 14½ gallons per acre. Under conditions where weeds are difficult to control increase the rate to 22 gallons per acre. Use in Asphalt. Urox has been found compatible with RC-70 asphalts and tars, and with AE

be used with materials other than those listed. **MIXING:** Add Urox Liquid to the dilution mixture allowing sufficient time for it to mix. Mixtures should not be heated above 100°F. Do not allow mixture to stand, apply immediately.

DILUTION

Use the following table to determine how much dilution is dependent upon the rate of application of Urox Liquid.

Rate of Asphalt Application per Square Yard	Dilution
0.10 gallon	
0.20 gallon	
0.25 gallon	
0.30 gallon	
0.33 gallon	

NOTE: Do Not apply, allow to drift or drift on croplands, lawns, trees or other desirable plants. Do Not contaminate water. Do Not allow contact with fertilizers, insecticides, herbicides. Equipment should be thoroughly cleaned to prevent corrosion. Equipment which has been used for applying insecticides should not be used for applying agricultural chemicals as plant injury may result.

Follow directions carefully. Timing and application rate and crop conditions, mixtures with other chemicals, and other influencing factors are beyond the control of the manufacturer. The safe use, storage or handling of this material should be in accordance with directions given herewith.

USE WITH ASPHALT, ASPHALT EMULSIONS AND TARS

For General Weed Control On Paved Areas
Such As Road Shoulders And Under Guard Rails

RATE: Under ordinary conditions use at the rate of 7 to 14½ gallons per acre. Under conditions where weeds are difficult to control increase the rate to 22 gallons per acre. Use in Asphalt, Asphalt Emulsions or Road Tar. Urox has been found compatible with SC-70, SC-250, MC-30, MC-70, RC-70 asphalts and tars, and with AEM-2 asphalt emulsion. If Urox Liquid is to

be used with materials other than those listed, test on a small scale first.

MIXING: Add Urox Liquid to the distributor tank just before application, allowing sufficient time for it to mix uniformly with the asphalt or tar. Mixtures should not be heated above 190°F.

Do not allow mixture to stand, apply as soon as thoroughly mixed.

DILUTION TABLE

Use the following table to determine how much UROX LIQUID to add to the asphalt, dependent upon the rate of application of asphalt.

Rate of Asphalt Application per Square Yard	Add <i>above rate</i> of UROX LIQUID to the following amount of Asphalt
0.10 gallon	500 gallons
0.20 gallon	950 gallons
0.25 gallon	1,200 gallons
0.30 gallon	1,450 gallons
0.33 gallon	1,600 gallons

NOTE: Do Not apply, allow to drift or drain or flush equipment onto or near croplands, lawns, trees or other desirable plants or to areas where their roots may extend. Do Not contaminate domestic water supplies. Do Not allow contact with fertilizers, insecticides, fungicides or seeds. Application equipment should be thoroughly cleaned with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals as plant injury may result.

Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

DIRECTIONS

NON-CROP AREAS

For use on Non-crop land such as Right of Ways, Industrial Parks, lumber yards, Truck Yards, Storage Areas, and Parking Lots for control of most weeds, grasses, and broadleaf weeds. Do not apply to ornamentals and lawns. Do not apply to any type of soil amount in excess of 100 lbs. per acre. Do not apply to any type of soil amount in excess of 100 lbs. per acre. Do not apply to any type of soil amount in excess of 100 lbs. per acre.

HOW TO APPLY: Use the recommended amount of product per acre. Apply to the soil surface. Do not apply to any type of soil amount in excess of 100 lbs. per acre. Do not apply to any type of soil amount in excess of 100 lbs. per acre.

CAUTION!

HARMFUL IF SWALLOWED
IRRITATING TO SKIN AND EYES

Do not get on skin, in eyes or on clothing. In case of contact, immediately wash skin with plenty of water; for eyes, wash with water for at least 15 minutes and get medical attention.
