This product is toxic to mammals and birds. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

PRODUCT DESCRIPTION

Each particle of the WARFARIN in this product has been specially coated with a material that reduces detection of the WARFARIN by the rodents at the time the bait is consumed. The coating may help assure greater acceptance of the bait in cases where rodent awareness of uncoated WARFARIN is responsible for low bait acceptability.
