

**MEMCO BRAND
CREOSOTE
PRESERVATIVE**

DIRECTIONS

Apply two coats of WOOD PRESERVING CREOSOTE, allowing time between coats for drying, to thoroughly season dry wood. If possible, especially for fence posts, take an open headed barrel and let posts soak in creosote for 12 to 24 hours. This allows the creosote to creep up through the fibers for better preservation. Be sure all saw cuts are soaked in creosote. Makes an excellent dark brown stain for Poultry Houses and Fences.

INERT INGREDIENTS:—3%
Carbon, Water

ACTIVE INGREDIENTS:
Coal Tar Neutral Oils, Tar

**ESPECIALLY COMPOUNDED TO GIVE
GREATER DURABILITY AND TO LENGTHEN
