POWER KILL

For Fast Knockdown and Control of Flies and other Common Insects in Homes and Buildings

POWER KILL spray is a powerful, fast-acting insecticide for rapid control of flies and many other common insects in homes, buildings, and other areas. It is effective against house flies, stable flies, and fruit flies, as well as other insects. **CAUTION: When used in food processing plants,**

Should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using this product as a space spray in these areas, apply only when plant is not in operation.

ACTIVE INGREDIENTS	100%
Piperonyl Butoxide, Technical**	2.75%
Permethrin	0.15%
Paraffinum Oil	97.10%
**Equivalent to 0.60% of total weight of active ingredients and to 0.15% of related compounds.	

POWER KILL Spray kills on contact flies, mosquitoes, gnats, sand flies, earwig flies, house flies, wasps, hornets, grain moths, and ants. For the best results in the control of these insects, use a good sprayer or atomizer adjusted to deliver fine mist. Apply in all areas where these insects are commonly found, and direct the liquid behind baseboards, molding, furniture, curtains, blinds, screens, and pipes, and into dark corners, and into cracks, crevices, recesses and similar hiding places. Treat recesses, if infested, more frequently and repeat applications as needed. Whenever possible, keep doors and windows closed for 30 minutes after spraying.

In the control of flying insects, direct the spray toward the upper portions of the enclosure and into the atmosphere with mist using 2 ounces to each 1000 cubic feet of space.
