

CAUTION: KEEP OUT OF REACH OF CHILDREN

# PINE OIL DISINFECTANT

## — DIRECTIONS —

In making emulsions of Pine Oil Disinfectants always add the water to the Disinfectant rather than vice-versa. If possible the water should be about 98 degrees Fahr.

Note: Be sure that all dirt is swept up and removed before applying disinfectant, and that disinfectant solution covers all contaminated surfaces.

For aid as an ordinary disinfection against S. Typhosa wash the contaminated area with a solution of 1 to 100.

Recommended for use on floors, walls and garbage cans.

### ACTIVE INGREDIENTS

Steam distilled pine oil .....	80.00%
Soap .....	7.03%
Isopropyl alcohol .....	3.48%
INERT INGREDIENTS .....	9.49%
	100.00%
