

NET WEIGHT 50 LBS.

Master®

B R A N D

25% PREMIUM GRADE

MALATHION WETTABLE POWDER

ACCEPTED

JUN 19, 1968

UNDER THE FEDERAL INSECTICIDE ACT
REGISTERED AND REEVALUATED AS
A FUNGICIDE AND FUNGICIDE
FOR ECONOMIC POISON REGISTER
NUMBER 249-176

With 40% Wetters

THIS PACKAGE CONTAINS

ACTIVE INGREDIENTS:	
Malathion*	25.0%
INERT INGREDIENTS:	75.0%
TOTAL	100.0%

*O,O-Dimethyl dithiophosphate of diethyl mercaptosuccinate.

DIRECTIONS

BEFORE STORING PEANUTS: Thoroughly clean warehouse and surroundings, apply a residual spray, as peanuts are unloaded in warehouse apply bulk treatment, consult G.F.A. Peanut Association for complete instructions.

SUPPLEMENTAL SURFACE SPRAY FOR FARMERS STOCK PEANUTS: Mix this material with water at the rate of 1 3/4 pounds to 2 gallons. The rate of application shall be 2 gallons per 1000 square feet of surface. The peanuts should be leveled off as much as possible before the surface spray is applied. The area to be treated is to be calculated on the actual surface of the stock, which will usually be greater than the floor area.

Lay boards over the surface of bulk peanuts to make a catwalk for inspectors, workmen, and spray operators. Move the boards during spraying to provide an insecticide deposit under them. Walking over the surface of sprayed peanuts disturbs the continuous deposit of insecticide and reduces the effectiveness of the treatment. Use powder equipment with a suitable agitator in the spray tank to apply the Wettable Powder spray. Mechanical equipment, in addition to providing proper agitation for the Wettable Powder spray, gives a spray stream that reaches far enough to require a minimum of walking over the surface of peanuts, has a capacity and rate of delivery

DIRECTIONS

BEFORE STORING PEANUTS: Thoroughly clean warehouse and surroundings, apply a residual spray, as peanuts are unloaded in warehouse apply bulk treatment, consult G.F.A. Peanut Association for complete instructions.

SUPPLEMENTAL SURFACE SPRAY FOR FARMERS STOCK PEANUTS: Mix this material with water at the rate of $1\frac{3}{4}$ pounds to 2 gallons. The rate of application shall be 2 gallons per 1000 square feet of surface. The peanuts should be leveled off as much as possible before the surface spray is applied. The area to be treated is to be calculated on the actual surface of the stock, which will usually be greater than the floor area.

Lay boards over the surface of bulk peanuts to make a catwalk for inspectors, workmen, and spray operators. Move the boards during spraying to provide an insecticide deposit under them. Walking over the surface of sprayed peanuts disturbs the continuous deposit of insecticide and reduces the effectiveness of the treatment. Use powder equipment with a suitable agitator in the spray tank to apply the Wettable Powder spray. Mechanical equipment, in addition to providing proper agitation for the Wettable Powder spray, gives a spray stream that reaches far enough to require a minimum of walking over the surface of peanuts, has a capacity and rate of delivery high enough to finish the job in a short time, and gives a constant nozzle pressure for uniform application. The operating pressure and nozzle opening should be adjusted to deliver a coarse, wet spray. A piston pump is necessary when using Wettable Powder sprays because the inert ingredients cause a gear pump to wear out rapidly.

The first surface spray is to be applied promptly after the warehouse is filled. Subsequent treatments are to be made as called for by the GFA Peanut Association, but not oftener than at monthly intervals. The Stored-Product Insects Branch, AMS, may be consulted as to the number of treatments needed.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

Harmful if swallowed. Avoid prolonged breathing of spray mist or dust. Avoid repeated or prolonged contact with skin. Wash thoroughly. Avoid contamination of feed and foodstuffs. Keep out of reach of children.

NOTICE

Stevens Industries, Inc. warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Stevens Industries, Inc. and buyer assumes the risk of any such use. Any damage arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damage such as loss of profits.
