DIRECTIONS

PEANUTS: For the suppression of alfalfa caterpillar, bean leaf beetle, green cloverworm, Japanese beetle, leafhoppers, thrips and velvetbean caterpillar. When used as recommended this product will also suppress Cercospora leaf spot on peanuts. Some leaf injury may occur if applications are made when tender foliage is wet. Sulphur may burn foliage when temperature is high. Do not make sulphur applications at such times.

Apply application when insects are first seen, apply to older leaves at the base of the plant. Apply at the rate of 15 to 20 pounds per acre when wind is calm for best results. Repeat applications every ten to fourteen days as needed.

CAUTION

Japanese beetle, leafhoppers, thrips and velvetbean caterpillar. When used as recommended this product will also suppress Cercospora leaf spot on peanuts. Some leaf injury may occur if applications are made when tender foliage is wet. Sulphur may burn foliage when temperature is high. Do not make sulphur applications at such times.

Begin application when insects or first spots appear on older leaves at the base of the plant. Apply at the rate of 15 to 20 pounds per acre when wind is calm for best results. Repeat applications every ten to fourteen days as needed.

CAUTION

HARMFUL IN INHALED OR SWALLOWED. Do not take internally. Avoid breathing of dust.

Skin contact may be harmful. Avoid contact.

Wash hands before eating. Take shower or bath after work.

Wear regular long sleeved work clothing. Change to clean clothing daily.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

This product will kill fish. Keep out of streams, rivers and water.

Note for Physician: Carbaryl is a moderate to serious cholinesterase inhibitor. Atropine is antidotal.

CAUTION

KEEP OUT OF REACH OF CHILDREN AND ANIMALS
