DIRECTIONS FOR USE

Flies, Mosquitoes, Gnats: Close room and discharge insect vapo-
rously in all parts of room, using 1 1/2 to 2 ounces for each
1000 cubic feet of space. Leave room closed for at least ten
minutes. Sweep up and destroy fallen insects. Repeat as needed.

Fleas (Infesting premises): Remove and destroy animals' bed-
ding and spray sleeping quarters freely, forcing the spray into
all cracks in the floor and about the room. Repeat when re-
infested.

Roaches, Waterbugs: Apply in all cracks and crevices in wood-
work, underneath sinks, dark places behind paper, and in all
places where roaches and waterbugs infest, contacting as many
insects as possible. Repeat the operation as often as necessary.

Clothes Moths, Carpet Beetles: Spray articles to be pro-
tected, giving particular attention to folds and seams. Interior
surfaces of storage containers, such as closets, chests, and
trunks should be sprayed regularly. The treatment should be
repeated every 30 days unless the articles are stored in moth-
tight containers.

**Grain Weevils, Caddis Flour Beetles, Grain Mites (Accessible
Stages):** Wet surface thoroughly and treat all infested surface
areas, in both runways and in the center, at the rate of 1 gallon
of this material to 1000 square feet of area, or in the upper
portion of run-off. Repeat when necessary.

CAUTION: Harmful to fish. Do not apply directly to fish.
Do not apply while food is being prepared in any way. Do not remain
in treated area and ventilate the area after treatment is com-
pleted. Thoroughly wash this table after a treated dish is
processing surfaces, etc., that have not been prior to use.
In case of impracticality of washing, do not allow food to come
in contact with treated surface. Remove bird cages and fish
bowls during spray application. Do not permit smoking or
near heat or open flame. Keep out of reach of children.
